Clinical Reference Guide for Aesthetic Medicine Professionals

Welcome to the **TherapDerma Mesotherapy Solutions Guide**, a clinical reference guide developed to help aesthetic practitioners, nurses, dermatologists, and authorised professionals quickly and efficiently identify the most suitable TherapDerma solutions for each clinical need. This guide has been designed using a practical approach based on patient observation. Each section presents real-life situations commonly encountered in daily clinical practice, allowing professionals to associate observable signs with the most appropriate TherapDerma solutions. Throughout this document you will find guidance protocols organised according to anatomical areas and aesthetic concerns, including:

- Hair treatments
- Facial rejuvenation
- Skin hydration and revitalisation
- Pigmentation disorders
- Facial and body detoxification
- Eye contour and lip treatments
- Facial and body contouring
- Cellulite and localised adiposity
- Facial and body skin laxity
- Fibrosis and stretch marks
- Rejuvenation of the hands, legs and buttocks

The objective of this guide is to simplify clinical decision-making, facilitate treatment selection and optimise the personalisation of aesthetic protocols.

TherapDerma combines innovation, clinical experience and advanced technology to provide professional solutions designed to meet the needs of modern aesthetic medicine.

KNOWLEDGE ★ INNOVATION ★ HARMONY

AREA 1 – HAIR**HAIR PATIENT 1****Anatomical Area**

Scalp

Concern

Hair Loss

What I Observe

- Increased daily hair shedding
- Hair visible on the pillow or during washing
- Reduced hair volume
- Progressive decrease in hair density

Typical Patient Profile

- Men and women
- Stress-related hair loss
- Hormonal changes
- Nutritional deficiencies

Treatment Goal

Reduce hair shedding and preserve existing hair density.

TherapDerma Solution

- General Alopecia

Why This Solution

Because it was specifically developed for the early signs of hair loss and follicular weakening, helping to maintain hair vitality and improve the follicular environment.

HAIR PATIENT 2**Anatomical Area**

Scalp

Concern

Early Alopecia

What I Observe

- Mild reduction in hair density
- Widening of the hair parting
- Reduced overall hair volume
- Early follicular miniaturisation

Typical Patient Profile

- Early androgenetic alopecia
- Young men
- Women experiencing progressive hair thinning

Treatment Goal

Slow the progression of alopecia and strengthen hair follicles.

TherapDerma Solution

- General Alopecia

Why This Solution

Because it is specifically intended for the early stages of alopecia when follicular recovery and stimulation potential remain high.

HAIR PATIENT 3

Anatomical Area

Scalp

Concern

Advanced Alopecia

What I Observe

- Significant loss of density
- Visible thinning areas
- Marked follicular miniaturisation
- Reduced hair coverage

Typical Patient Profile

- Advanced androgenetic alopecia
- Long-term progression

Treatment Goal

Improve scalp quality and optimise the regenerative potential of hair follicles.

TherapDerma Solution

- Golden Hair

Why This Solution

Because it represents TherapDerma's most advanced biomimetic hair solution for patients with significant density loss requiring intensive hair stimulation.

HAIR PATIENT 4

Anatomical Area

Scalp

Concern

Fine and Weak Hair

What I Observe

- Thin hair shafts
- Hair fragility
- Reduced resistance
- Lack of volume

Typical Patient Profile

- Men and women
- Stress-related hair weakening
- Restrictive diets
- Age-related hair changes

Treatment Goal

Improve hair quality and increase hair strength.

TherapDerma Solution

- More Hair

Why This Solution

Because it is specifically designed to strengthen weakened hair and improve the overall quality of the hair fibre.

HAIR PATIENT 5

Anatomical Area

Scalp

Concern

Oily Hair

What I Observe

- Excess sebum production
- Shiny appearance
- Frequent need for washing
- Rapid build-up of oil

Typical Patient Profile

- Sebaceous imbalance
- Younger patients
- Hormonal changes

Treatment Goal

Improve scalp balance and overall scalp health.

TherapDerma Solution

- General Alopecia

Why This Solution

Because it helps improve the follicular environment and supports a healthier, more balanced scalp.

HAIR PATIENT 6

Anatomical Area

Scalp

Concern

Seborrhoea

What I Observe

- Significant excess oil production
- Occasional itching
- Congested scalp sensation
- Heavy hair appearance

Typical Patient Profile

- Patients with sebaceous hyperactivity

Treatment Goal

Promote a healthier scalp environment for optimal hair growth.

TherapDerma Solution

- General Alopecia

Why This Solution

HAIR PATIENT 7

Anatomical Area

Scalp

Concern

Follicular Strengthening

What I Observe

- Fragile hair
- Reduced hair resistance
- Declining hair quality

Typical Patient Profile

- Patients seeking preventive hair care
- Weakened hair

Treatment Goal

Strengthen hair follicles and improve hair quality.

TherapDerma Solution

- More Hair

Why This Solution

Because it has been specifically formulated to strengthen the hair structure and improve overall hair resistance.

HAIR PATIENT 8

Anatomical Area

Scalp

Concern

Hair Regeneration

What I Observe

- Loss of hair density
- Weak and fragile hair
- Reduced scalp quality
- Need for advanced regenerative support

Typical Patient Profile

- Moderate to advanced alopecia
- Patients seeking high-level hair treatments

Treatment Goal

Stimulate advanced hair regeneration processes.

TherapDerma Solution

- Golden Hair

Why This Solution

Because it represents TherapDerma's premium biomimetic hair solution for advanced hair regeneration and overall improvement of hair quality.

HAIR PATIENT 9
Anatomical Area

Scalp

Concern

Postpartum Hair Recovery

What I Observe

- Significant hair shedding following pregnancy
- Temporary reduction in hair density
- Finer hair texture
- General hair weakening

Typical Patient Profile

- Women between 2 and 12 months postpartum

Treatment Goal

Restore hair density and strengthen the hair.

TherapDerma Solution

- General Alopecia

Why This Solution

Because it is particularly suitable for diffuse hair loss situations where the primary objective is to restore hair vitality and density.

KNOWLEDGE ★ INNOVATION ★ HARMONY

AREA 2 – FACE – FACIAL AGEING

FACIAL AGEING PATIENT 1

Anatomical Area

Periocular Area

Concern

Periocular Wrinkles

What I Observe

- Fine lines around the eyes
- Crow’s feet when smiling
- Wrinkles visible during facial expression
- Early loss of elasticity

Typical Patient Profile

- 30–45 years old
- Early photoageing
- Frequent facial expressions

Treatment Goal

Soften early periocular wrinkles and help prevent their progression.

TherapDerma Solution

 No Wrinkles

Why This Solution

Because it is specifically designed for the treatment of early expression lines and dynamic wrinkles, particularly in highly mobile facial areas.

FACIAL AGEING PATIENT 2

Anatomical Area

Forehead

Concern

Forehead Wrinkles

What I Observe

- Visible horizontal lines
- Persistent expression wrinkles
- Progressive deepening of forehead folds

Typical Patient Profile

- 35–50 years old
- High facial muscle activity

Treatment Goal

Reduce the appearance of forehead wrinkles and improve overall skin quality.

TherapDerma Solution

 No Wrinkles

Why This Solution

Because it was specifically developed to target early facial wrinkles and expression lines.

FACIAL AGEING PATIENT 3

Anatomical Area

Face

Concern

Deep Wrinkles

What I Observe

- Wrinkles visible even at rest
- Pronounced facial folds
- Loss of elasticity
- Visible signs of ageing

Typical Patient Profile

- Over 45 years old
- Accumulated photoageing

Treatment Goal

Improve the appearance of established wrinkles and rejuvenate the skin.

TherapDerma Solution

- Forever Young

Why This Solution

Because it is specifically formulated for the treatment of established wrinkles and visible signs of skin ageing.

FACIAL AGEING PATIENT 4

Anatomical Area

Face

Concern

Early Skin Laxity

What I Observe

- Mild loss of firmness
- Less defined facial contours
- Reduced skin tension

Typical Patient Profile

- 35–50 years old
- Early facial ageing

Treatment Goal

Improve firmness and help prevent the progression of skin laxity.

TherapDerma Solution

- Mesolifting

Why This Solution

Because it is specifically designed to improve skin firmness, elasticity and structural support.

FACIAL AGEING PATIENT 5

Anatomical Area

Face

Concern

Moderate Skin Laxity

What I Observe

- Visible tissue sagging
- Loss of facial definition
- Reduced dermal support

Typical Patient Profile

- 45–60 years old

Treatment Goal

Strengthen the dermal structure and improve facial firmness.

TherapDerma Solution

- Baby Face

Why This Solution

Because it helps improve dermal matrix quality and promotes firmer, denser-looking skin.

FACIAL AGEING PATIENT 6

Anatomical Area

Face

Concern

Loss of Elasticity

What I Observe

- Less flexible skin
- Reduced recovery capacity
- Early signs of structural ageing

Typical Patient Profile

- 40+ years old

Treatment Goal

Improve elasticity and overall skin quality.

TherapDerma Solution

- Mesolifting

Why This Solution

Because it is specifically intended to improve skin elasticity and reinforce skin firmness.

FACIAL AGEING PATIENT 7

Anatomical Area

Face

Concern

Ageing Skin

What I Observe

- Visible wrinkles
- Reduced luminosity
- Loss of firmness
- Declining dermal quality

Typical Patient Profile

TherapDerma – Where science meets Beauty

- Over 50 years old

Treatment Goal

Globally improve the quality and appearance of ageing skin.

TherapDerma Solution

- ✓ PDRN Renaissance

Why This Solution

Because it is designed for advanced cellular regeneration and overall improvement of skin quality in ageing skin.

FACIAL AGEING PATIENT 8

Anatomical Area

Face

Concern

Intensive Ageing Prevention

What I Observe

- Early signs of ageing
- Progressive loss of radiance
- Initial decline in skin quality

Typical Patient Profile

- 25–40 years old
- Prevention-focused patients

Treatment Goal

Act before advanced signs of ageing become established.

TherapDerma Solution

- ✓ Stay Young

Why This Solution

Because it is TherapDerma's progressive anti-ageing programme designed to help prevent and delay the visible signs of ageing.

FACIAL AGEING PATIENT 9

Anatomical Area

Face

Concern

Complete Facial Rejuvenation

What I Observe

- Wrinkles
- Loss of firmness
- Reduced radiance
- Dehydration
- Declining skin quality

Typical Patient Profile

- Patients seeking a comprehensive approach

Treatment Goal

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

Simultaneously improve all major signs of facial ageing.

TherapDerma Solution

- ✔ Full Skin

Why This Solution

Because it is TherapDerma’s most comprehensive progressive programme for global facial rejuvenation.

FACIAL AGEING PATIENT 10

Anatomical Area

Face

Concern

Non-Surgical Facial Lifting

What I Observe

- Facial skin laxity
- Loss of jawline definition
- Altered facial contours
- Tissue descent

Typical Patient Profile

- 45–65 years old

Treatment Goal

Improve facial firmness and redefine facial contours.

TherapDerma Solution

- ✔ Baby Face + Mesolifting

Why This Solution

Because this combination simultaneously targets firmness, elasticity and dermal support, providing a comprehensive facial rejuvenation strategy.

FACIAL AGEING PATIENT 11

Anatomical Area

Face

Concern

Premium Facial Rejuvenation

What I Observe

- Mature skin
- Wrinkles
- Skin laxity
- Reduced cellular regeneration

Typical Patient Profile

- Premium patients
- Over 50 years old

Treatment Goal

Achieve the highest possible improvement in overall skin quality.

TherapDerma Solution

✔ Golden Youth

Why This Solution

Because it represents TherapDerma’s premium biomimetic solution for comprehensive facial rejuvenation.

FACIAL AGEING PATIENT 12

Anatomical Area

Face

Concern

Advanced Dermal Regeneration

What I Observe

- Thin skin
- Deep wrinkles
- Reduced regenerative capacity
- Advanced signs of ageing

Typical Patient Profile

- Patients with advanced facial ageing
- Post GLP-1 patients
- Severely compromised skin quality

Treatment Goal

Stimulate deep cellular regeneration and improve overall tissue quality.

TherapDerma Solution

✔ Muraxin Gold

Why This Solution

Because it is one of TherapDerma’s most advanced biomimetic solutions for dermal regeneration and deep bio-stimulation.

QUICK CLINICAL SUMMARY – FACIAL AGEING

Concern	TherapDerma Solution
Periocular Wrinkles	✔ No Wrinkles
Forehead Wrinkles	✔ No Wrinkles
Deep Wrinkles	✔ Forever Young
Early Skin Laxity	✔ Mesolifting
Moderate Skin Laxity	✔ Baby Face
Loss of Elasticity	✔ Mesolifting
Ageing Skin	✔ PDRN Renaissance
Intensive Anti-Ageing Prevention	✔ Stay Young
Complete Facial Rejuvenation	✔ Full Skin
Non-Surgical Facial Lifting	✔ Baby Face + Mesolifting
Premium Facial Rejuvenation	✔ Golden Youth

Concern **TherapDerma Solution**

Advanced Dermal Regeneration Muraxin Gold

QUICK DECISION GUIDE

I observe early wrinkles

→ No Wrinkles

I observe deep wrinkles

→ Forever Young

I observe loss of firmness

→ Mesolifting

I observe more pronounced skin laxity

→ Baby Face

I observe overall facial ageing

→ PDRN Renaissance

I want intensive anti-ageing prevention

→ Stay Young

I want complete facial rejuvenation

→ Full Skin

I want a non-surgical lifting effect

→ Baby Face + Mesolifting

I want the premium rejuvenation solution

→ Golden Youth

I want maximum dermal regeneration

→ Muraxin Gold

AREA 3 – FACE – HYDRATION

HYDRATION PATIENT 1

Anatomical Area

Face

Concern

Dry Skin

What I Observe

- Feeling of tightness
- Reduced skin comfort
- Mild flaking
- Dull appearance
- Loss of softness

Typical Patient Profile

- Naturally dry skin
- Cold or dry climates
- Frequent sun exposure
- Young and adult patients

Treatment Goal

Restore physiological skin hydration and improve skin comfort.

TherapDerma Solution

- ✓ Hyaluronic Acid 2% Low Viscosity

Why This Solution

Because it is specifically formulated to provide superficial hydration and improve the skin's ability to retain moisture in cases of mild dryness.

HYDRATION PATIENT 2

Anatomical Area

Face

Concern

Dehydrated Skin

What I Observe

- Fine dehydration lines
- Tired appearance
- Reduced elasticity
- Loss of radiance
- Uneven texture

Typical Patient Profile

- 30–55 years old
- Stress
- Sun exposure
- Lack of hydrating skincare

Treatment Goal

Increase skin moisture levels and improve elasticity.

TherapDerma Solution

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

✓ Hyaluronic Acid 3.5% Low Viscosity

Why This Solution

Because it provides more intensive hydration and helps restore skin elasticity and radiance.

HYDRATION PATIENT 3

Anatomical Area

Face

Concern

Severe Dehydration

What I Observe

- Very dry skin
- Dull appearance
- Significant loss of elasticity
- Persistent feeling of tightness
- Pronounced dehydration lines

Typical Patient Profile

- Over 45 years old
- Photoaged skin
- Mature skin

Treatment Goal

Deeply restore hydration and improve overall skin quality.

TherapDerma Solution

✓ Hyaluronic Acid 3.5% Ultra Low Viscosity

Why This Solution

Because it is the most intensive hyaluronic acid formulation within the TherapDerma range for advanced dehydration cases.

HYDRATION PATIENT 4

Anatomical Area

Face

Concern

Rough Skin

What I Observe

- Uneven texture
- Lack of softness
- Aged appearance
- Reduced radiance

Typical Patient Profile

- Photoaged skin
- Smokers
- Patients exposed to cumulative environmental damage

Treatment Goal

Improve skin texture and increase skin softness.

TherapDerma Solution

✔ New Face

Why This Solution

Because it combines hydration and revitalisation, helping to improve skin texture, elasticity and overall appearance.

HYDRATION PATIENT 5

Anatomical Area

Face

Concern

Age-Related Dehydration

What I Observe

- Thin skin
- Superficial wrinkles
- Loss of elasticity
- Reduced radiance

Typical Patient Profile

- Over 40 years old
- Progressive facial ageing

Treatment Goal

Hydrate the skin while simultaneously improving visible signs of ageing.

TherapDerma Solution

✔ New Face

Why This Solution

Because it was developed to combine deep hydration with improved skin quality in patients presenting signs of ageing.

HYDRATION PATIENT 6

Anatomical Area

Face

Concern

Premium Bio-Hydration

What I Observe

- Chronic dehydration
- Loss of elasticity
- Thin skin
- Reduced dermal quality

Typical Patient Profile

- Demanding patients
- Over 45 years old
- Mature skin

Treatment Goal

Achieve advanced hydration together with an overall improvement in skin quality.

TherapDerma Solution

- ✔ Thefil Gold 16%

Why This Solution

Because it combines hyaluronic acid with components designed to improve hydration and overall skin quality, making it one of the premium solutions within the TherapDerma hydration range.

HYDRATION PATIENT 7

Anatomical Area

Face

Concern

Dehydrated and Ageing Skin

What I Observe

- Fine wrinkles
- Lack of hydration
- Reduced radiance
- Decreased elasticity

Typical Patient Profile

- Over 45 years old
- Photoaged skin

Treatment Goal

Combine deep hydration with facial rejuvenation.

TherapDerma Solution

- ✔ Thefil Gold 16%

Why This Solution

Because it allows hydration, elasticity improvement and overall skin quality enhancement to be addressed simultaneously.

QUICK CLINICAL SUMMARY – FACIAL HYDRATION

Concern	TherapDerma Solution
Dry Skin	✔ Hyaluronic Acid 2% Low Viscosity
Dehydrated Skin	✔ Hyaluronic Acid 3.5% Low Viscosity
Severe Dehydration	✔ Hyaluronic Acid 3.5% Ultra Low Viscosity
Rough Skin	✔ New Face
Dehydration + Ageing	✔ New Face
Premium Bio-Hydration	✔ Thefil Gold 16%
Dehydrated and Ageing Skin	✔ Thefil Gold 16%

QUICK DECISION GUIDE

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

I observe mild dryness

→ Hyaluronic Acid 2% Low Viscosity

I observe moderate dehydration

→ Hyaluronic Acid 3.5% Low Viscosity

I observe severe dehydration

→ Hyaluronic Acid 3.5% Ultra Low Viscosity

I observe rough texture and lack of radiance

→ New Face

I observe dehydration associated with ageing

→ New Face

I want a premium hydration solution

→ Thefil Gold 16%

I want hydration and rejuvenation simultaneously

→ Thefil Gold 16%

AREA 4 – FACE – PIGMENTATION

PIGMENTATION PATIENT 1

Anatomical Area

Face

Concern

Melasma

What I Observe

- Diffuse brown pigmentation
- Symmetrical distribution
- Predominantly on the cheeks, forehead and upper lip
- Chronic and recurrent pigmentation

Typical Patient Profile

- Women aged 30–55 years
- Hormonal changes
- Pregnancy
- Frequent sun exposure

Treatment Goal

Improve skin tone uniformity and reduce the appearance of pigmentation.

TherapDerma Solution

- Revital Mix

Why This Solution

Because it is TherapDerma’s specific solution for pigmentation concerns, helping to improve the appearance of discolouration and promote a more even skin tone.

PIGMENTATION PATIENT 2

Anatomical Area

Face

Concern

Post-Inflammatory Hyperpigmentation

What I Observe

- Residual dark spots
- Acne-related marks
- Post-procedure pigmentation
- Localised discolouration

Typical Patient Profile

- Patients with a history of acne
- Reactive skin types
- Previous aesthetic procedures

Treatment Goal

Reduce the intensity of residual pigmentation and improve overall skin quality.

TherapDerma Solution

- Revital Mix

Why This Solution

Because it is specifically designed for pigmentation correction protocols and improvement of skin tone uniformity.

PIGMENTATION PATIENT 3

Anatomical Area

Face

Concern

Solar Lentigines

What I Observe

- Well-defined brown spots
- Photoageing
- Accumulated sun damage
- Uneven pigmentation

Typical Patient Profile

- Over 40 years old
- History of cumulative sun exposure

Treatment Goal

Improve the appearance of sun-induced pigmentation.

TherapDerma Solution

- Revital Mix

Why This Solution

Because it helps improve pigmentation concerns associated with photoageing.

PIGMENTATION PATIENT 4

Anatomical Area

Face

Concern

Uneven Skin Tone

What I Observe

- Areas darker than others
- Uneven complexion
- Loss of skin tone uniformity
- Irregular overall appearance

Typical Patient Profile

- Any age group
- Photoaged skin
- Mild pigmentation concerns

Treatment Goal

Improve skin tone uniformity and enhance overall radiance.

TherapDerma Solution

- Revital Mix

Why This Solution

Because it is designed to improve skin tone homogeneity and promote a more even-looking complexion.

PIGMENTATION PATIENT 5

Anatomical Area

Face

Concern

Dull Skin with Irregular Pigmentation

What I Observe

- Mild pigmentation
- Reduced radiance
- Dull complexion
- Tired-looking skin

Typical Patient Profile

- Smokers
- Oxidative stress
- Early photoageing

Treatment Goal

Simultaneously improve pigmentation and skin radiance.

TherapDerma Solution

- ✓ Revital Mix + Anti-Aging with Vitamin C

Why This Solution

Because Revital Mix helps improve skin tone uniformity while Anti-Aging with Vitamin C provides antioxidant support and skin revitalisation.

PIGMENTATION PATIENT 6

Anatomical Area

Face

Concern

Skin Brightening

What I Observe

- Patient seeking a brighter complexion
- Dull skin tone
- Diffuse pigmentation
- Lack of uniformity

Typical Patient Profile

- Asian patients
- Patients concerned about skin tone appearance

Treatment Goal

Improve radiance and promote a visually more even skin tone.

TherapDerma Solution

- ✓ Revital Mix

Why This Solution

Because it is TherapDerma’s primary depigmenting solution designed to improve the appearance of skin tone and overall radiance.

PIGMENTATION PATIENT 7

Anatomical Area

Face

Concern

Age-Related Pigmentation

What I Observe

- Lentigines
- Uneven skin tone
- Photoageing
- Loss of radiance

Typical Patient Profile

- Over 50 years old
- Accumulated sun damage

Treatment Goal

Improve pigmentation while enhancing the overall quality of ageing skin.

TherapDerma Solution

- ✓ Revital Mix + PDRN Renaissance

Why This Solution

Because Revital Mix targets pigmentation concerns while PDRN Renaissance helps improve the overall quality of ageing skin through advanced cellular regeneration.

QUICK CLINICAL SUMMARY – FACIAL PIGMENTATION

Concern	TherapDerma Solution
Melasma	✓ Revital Mix
Post-Inflammatory Hyperpigmentation	✓ Revital Mix
Solar Lentigines	✓ Revital Mix
Uneven Skin Tone	✓ Revital Mix
Skin Brightening	✓ Revital Mix
Pigmentation + Dull Skin	✓ Revital Mix + Anti-Aging with Vitamin C
Age-Related Pigmentation	✓ Revital Mix + PDRN Renaissance

QUICK DECISION GUIDE

I observe melasma

- ✓ Revital Mix

I observe post-acne hyperpigmentation

- ✓ Revital Mix

I observe sun-induced pigmentation

→ Revital Mix

I observe uneven skin tone

→ Revital Mix

I observe dull skin with irregular pigmentation

→ Revital Mix + Anti-Aging with Vitamin C

I observe pigmentation associated with ageing

→ Revital Mix + PDRN Renaissance

AREA 5 – FACE – DETOX

DETOX PATIENT 1

Anatomical Area

Face

Concern

Tired-Looking Skin

What I Observe

- Reduced radiance
- Fatigued appearance
- Loss of skin vitality
- Dull complexion
- Visible signs of accumulated stress

Typical Patient Profile

- Individuals with demanding lifestyles
- Lack of rest
- Work-related stress
- Frequent travellers

Treatment Goal

Restore skin vitality and improve overall appearance.

TherapDerma Solution

- Biorevital Detox

Why This Solution

Because it is specifically formulated to revitalise skin exposed to stress and external aggressors, helping improve the appearance of fatigued skin.

DETOX PATIENT 2

Anatomical Area

Face

Concern

Toxin-Loaded Skin

What I Observe

- Dull complexion
- Loss of freshness
- Congested-looking skin
- Reduced natural radiance

Typical Patient Profile

- Smokers
- Frequent exposure to pollution
- High oxidative stress

Treatment Goal

Promote skin revitalisation and improve overall skin appearance.

TherapDerma Solution

- Biorevital Detox

Why This Solution

Because it was developed for detoxification and revitalisation protocols intended for skin exposed to environmental and oxidative stressors.

DETOX PATIENT 3

Anatomical Area

Face

Concern

Grey, Dull Skin

What I Observe

- Dull skin tone
- Lack of natural radiance
- Aged appearance
- Reduced skin tone uniformity

Typical Patient Profile

- Smokers
- Chronic stress
- Lack of rest

Treatment Goal

Restore radiance and improve the healthy appearance of the skin.

TherapDerma Solution

- ✓ Anti-Aging with Vitamin C

Why This Solution

Because it combines antioxidants and Vitamin C, helping to improve skin radiance and combat the visible effects of oxidative stress.

DETOX PATIENT 4

Anatomical Area

Face

Concern

Oxidised Skin

What I Observe

- Photoageing
- Loss of radiance
- Dull complexion
- Visible signs of environmental damage

Typical Patient Profile

- Smokers
- Cumulative sun exposure
- Urban lifestyles

Treatment Goal

Combat oxidative stress and improve overall skin quality.

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

TherapDerma Solution

- ✓ Anti-Aging with Vitamin C

Why This Solution

Because it is specifically designed to combat oxidative damage and promote skin revitalisation.

DETOX PATIENT 5

Anatomical Area

Face

Concern

Smoker's Skin

What I Observe

- Greyish skin tone
- Reduced radiance
- Fatigued appearance
- Premature signs of ageing

Typical Patient Profile

- Active smokers
- Recent ex-smokers

Treatment Goal

Reduce the visible impact of smoking on the skin.

TherapDerma Solution

- ✓ Anti-Aging with Vitamin C

Why This Solution

Because it provides intensive antioxidant support and helps improve the appearance of skin exposed to tobacco-related oxidative stress.

DETOX PATIENT 6

Anatomical Area

Face

Concern

Urban Skin

What I Observe

- Reduced radiance
- Tired appearance
- Dull complexion
- Reduced skin quality

Typical Patient Profile

- People living in large cities
- High exposure to environmental pollution

Treatment Goal

Revitalise the skin and improve its resistance to external aggressors.

TherapDerma Solution

- ✓ Biorevital Detox

Why This Solution

Because it was specifically developed for skin exposed to environmental stress and urban pollution.

DETOX PATIENT 7

Anatomical Area

Face

Concern

Advanced Oxidative Stress

What I Observe

- Dull skin
- Photoageing
- Reduced elasticity
- Signs of accelerated ageing

Typical Patient Profile

- Over 45 years old
- Cumulative sun exposure
- Smokers
- Chronic stress

Treatment Goal

Improve skin quality and combat accumulated oxidative damage.

TherapDerma Solution

- ✓ Anti-Aging with Vitamin C + Biorevital Detox

Why This Solution

Because Anti-Aging with Vitamin C provides powerful antioxidant support while Biorevital Detox complements overall skin revitalisation.

DETOX PATIENT 8

Anatomical Area

Face

Concern

Premium Facial Detox

What I Observe

- Fatigued skin
- Oxidative stress
- Reduced radiance
- Declining skin quality

Typical Patient Profile

- Premium patients
- Patients seeking a global improvement in skin quality

Treatment Goal

Maximise skin revitalisation and recovery of overall skin quality.

TherapDerma Solution

✔ Biorevital Detox + Golden Skin

Why This Solution

Because Biorevital Detox revitalises the skin while Golden Skin provides a premium enhancement of skin quality and radiance.

QUICK CLINICAL SUMMARY – FACIAL DETOX

Concern	TherapDerma Solution
Tired-Looking Skin	✔ Biorevital Detox
Toxin-Loaded Skin	✔ Biorevital Detox
Grey, Dull Skin	✔ Anti-Aging with Vitamin C
Oxidised Skin	✔ Anti-Aging with Vitamin C
Smoker's Skin	✔ Anti-Aging with Vitamin C
Urban Skin	✔ Biorevital Detox
Advanced Oxidative Stress	✔ Anti-Aging with Vitamin C + Biorevital Detox
Premium Facial Detox	✔ Biorevital Detox + Golden Skin

QUICK DECISION GUIDE

I observe tired-looking skin

→ ✔ Biorevital Detox

I observe toxin-loaded skin

→ ✔ Biorevital Detox

I observe grey or dull skin

→ ✔ Anti-Aging with Vitamin C

I observe skin affected by oxidative ageing

→ ✔ Anti-Aging with Vitamin C

I observe smoker's skin

→ ✔ Anti-Aging with Vitamin C

I observe skin exposed to urban pollution

→ ✔ Biorevital Detox

I observe significant oxidative stress

→ ✔ Anti-Aging with Vitamin C + Biorevital Detox

I want a premium detox solution

→ ✔ Biorevital Detox + Golden Skin

AREA 6 – EYES

EYES PATIENT 1

Anatomical Area

Periocular Area

Concern

Vascular Dark Circles

What I Observe

- Bluish or purplish discoloration beneath the eyes
- Tired appearance
- Increased visibility of blood vessels
- More noticeable with fatigue

Typical Patient Profile

- Individuals with lack of sleep
- Stress
- Genetic predisposition
- Thin skin

Treatment Goal

Improve the appearance of dark discoloration and revitalise the eye contour area.

TherapDerma Solution

- ✓ Oligoelements with Vitamin C

Why This Solution

Because it is specifically designed for the aesthetic treatment of the periocular area and the improvement of dark circles.

EYES PATIENT 2

Anatomical Area

Periocular Area

Concern

Pigmented Dark Circles

What I Observe

- Brown or dark brown pigmentation
- Persistent discoloration
- Dull appearance of the eye contour area

Typical Patient Profile

- Medium and darker phototypes
- Family history
- Sun exposure

Treatment Goal

Improve skin tone uniformity in the periocular area.

TherapDerma Solution

- ✓ Oligoelements with Vitamin C

Why This Solution

Because it helps improve the quality and radiance of the periocular skin and is TherapDerma's primary solution for dark circles.

EYES PATIENT 3

Anatomical Area

Periocular Area

Concern

Mixed Dark Circles

What I Observe

- Combination of vascular and pigmented components
- Tired appearance
- General darkening of the periocular area

Typical Patient Profile

- Patients over 35 years old
- Chronic fatigue
- Stress

Treatment Goal

Improve the overall appearance of dark circles.

TherapDerma Solution

- ✓ Oligoelements with Vitamin C

Why This Solution

Because it was specifically designed for periocular revitalisation protocols.

EYES PATIENT 4

Anatomical Area

Tear Trough

Concern

Sunken Eyes

What I Observe

- Hollowing of the periocular area
- Tired appearance
- Loss of volume beneath the eyes
- Pronounced tear trough

Typical Patient Profile

- Over 40 years old
- Facial fat loss
- Post-weight-loss patients
- Post-GLP-1 patients

Treatment Goal

Improve tissue quality and promote a more rested appearance.

TherapDerma Solution

✓ PDRN Renaissance

Why This Solution

Because it is designed for advanced cellular regeneration and overall improvement of dermal quality in areas affected by tissue support loss.

EYES PATIENT 5

Anatomical Area

Periocular Area

Concern

Advanced Sunken Eyes

What I Observe

- Significant hollowing
- Thin skin
- Aged appearance
- Reduced dermal quality

Typical Patient Profile

- Over 50 years old
- Significant facial volume loss

Treatment Goal

Promote regeneration and improve periocular skin quality.

TherapDerma Solution

✓ Muraxin Gold

Why This Solution

Because it represents one of TherapDerma’s most advanced biomimetic solutions for deep dermal regeneration and improvement of ageing tissues.

EYES PATIENT 6

Anatomical Area

Lower Eyelid

Concern

Mild Eye Bags

What I Observe

- Mild puffiness beneath the eyes
- Fluid retention
- Tired morning appearance

Typical Patient Profile

- Lack of sleep
- Fluid retention
- Genetic predisposition

Treatment Goal

Improve the appearance of the periocular area and revitalise the tissues.

TherapDerma Solution

✓ Oligoelements with Vitamin C

Why This Solution

Because it helps improve the overall appearance of the eye contour area and is TherapDerma's specific solution for this anatomical region.

EYES PATIENT 7

Anatomical Area

Lower Eyelid

Concern

Age-Related Eye Bags

What I Observe

- Persistent visible eye bags
- Thin skin
- Reduced elasticity
- Aged appearance

Typical Patient Profile

- Over 45 years old

Treatment Goal

Improve skin quality and the overall appearance of the eye contour area.

TherapDerma Solution

- ✓ PDRN Renaissance

Why This Solution

Because it helps improve the quality of ageing skin and promotes regeneration of periocular tissues.

EYES PATIENT 8

Anatomical Area

Periocular Area

Concern

Comprehensive Eye Rejuvenation

What I Observe

- Dark circles
- Hollowing
- Reduced radiance
- Signs of periocular ageing

Typical Patient Profile

- Patients over 40 years old
- Seeking overall eye rejuvenation

Treatment Goal

Globally improve the aesthetic quality of the eye contour area.

TherapDerma Solution

- ✓ Oligoelements with Vitamin C + PDRN Renaissance

Why This Solution

TherapDerma – Where science meets Beauty

Because Oligoelements with Vitamin C focuses on revitalising the eye contour area while PDRN Renaissance provides advanced regeneration and improvement of dermal quality.

QUICK CLINICAL SUMMARY – EYES

Concern	TherapDerma Solution
Vascular Dark Circles	✔ Oligoelements with Vitamin C
Pigmented Dark Circles	✔ Oligoelements with Vitamin C
Mixed Dark Circles	✔ Oligoelements with Vitamin C
Sunken Eyes	✔ PDRN Renaissance
Advanced Sunken Eyes	✔ Muraxin Gold
Mild Eye Bags	✔ Oligoelements with Vitamin C
Age-Related Eye Bags	✔ PDRN Renaissance
Comprehensive Eye Rejuvenation	✔ Oligoelements with Vitamin C + PDRN Renaissance

QUICK DECISION GUIDE

I observe dark circles

→ ✔ Oligoelements with Vitamin C

I observe periocular hollowing

→ ✔ PDRN Renaissance

I observe significant loss of dermal quality

→ ✔ Muraxin Gold

I observe mild eye bags

→ ✔ Oligoelements with Vitamin C

I observe age-related eye bags

→ ✔ PDRN Renaissance

I want comprehensive eye rejuvenation

→ ✔ Oligoelements with Vitamin C + PDRN Renaissance

AREA 7 – LIPS**LIPS PATIENT 1****Anatomical Area**

Lips

Concern

Thin Lips

What I Observe

- Limited lip volume
- Naturally thin lips
- Reduced aesthetic presence of the lips
- Lack of vermilion border definition

Typical Patient Profile

- Young patients with naturally thin lips
- Patients seeking to improve the appearance of their lips without volumising procedures

Treatment Goal

Improve hydration, quality and overall lip appearance.

TherapDerma Solution

- ✓ Passion Lips

Why This Solution

Because it is TherapDerma's specific progressive programme for comprehensive lip revitalisation and overall improvement of lip appearance.

LIPS PATIENT 2**Anatomical Area**

Lips

Concern

Wrinkled Lips

What I Observe

- Visible wrinkles on the lip surface
- Loss of hydration
- Aged appearance
- Reduced softness

Typical Patient Profile

- Over 40 years old
- Smokers
- Photoaged skin

Treatment Goal

Improve lip skin quality and reduce the aged appearance of the lips.

TherapDerma Solution

- ✓ Amazing Lips

Why This Solution

Because it is specifically designed to hydrate, revitalise and improve the quality of ageing lips.

LIPS PATIENT 3

Anatomical Area

Perioral Area

Concern

Barcode Lines

What I Observe

- Vertical wrinkles above the upper lip
- Pronounced lines around the mouth
- Visible signs of perioral ageing

Typical Patient Profile

- Over 45 years old
- Smokers
- Photoaged skin
- Loss of elasticity

Treatment Goal

Improve the quality of the perioral skin and soften the appearance of vertical lines.

TherapDerma Solution

- ✓ Amazing Lips

Why This Solution

Because it helps improve hydration, elasticity and skin quality of the lip and perioral area.

LIPS PATIENT 4

Anatomical Area

Lips

Concern

Dehydrated Lips

What I Observe

- Dryness
- Loss of natural shine
- Feeling of tightness
- Tendency to flake

Typical Patient Profile

- Any age group
- Sun exposure
- Dry climates

Treatment Goal

Restore hydration and improve lip comfort.

TherapDerma Solution

- ✓ Amazing Lips

Why This Solution

Because it was specifically developed to improve lip hydration and overall lip quality.

LIPS PATIENT 5

Anatomical Area

Lips

Concern

Loss of Lip Definition

What I Observe

- Poorly defined lip contour
- Reduced vermilion border definition
- Less youthful appearance

Typical Patient Profile

- Over 35 years old
- Early signs of lip ageing

Treatment Goal

Improve the appearance and definition of the lips.

TherapDerma Solution

- Passion Lips

Why This Solution

Because it is the progressive protocol specifically developed for complete lip revitalisation.

LIPS PATIENT 6

Anatomical Area

Lips

Concern

Complete Lip Revitalisation

What I Observe

- Loss of hydration
- Reduced radiance
- Lack of definition
- Aged appearance

Typical Patient Profile

- Patients seeking overall lip improvement

Treatment Goal

Simultaneously improve hydration, quality, softness and overall lip appearance.

TherapDerma Solution

- Passion Lips

Why This Solution

Because it represents TherapDerma's complete lip revitalisation programme, designed to comprehensively address the aesthetic needs of the lips.

LIPS PATIENT 7

Anatomical Area

Lips and Perioral Area

Concern

Global Lip Ageing

What I Observe

- Thin lips
- Lip wrinkles
- Barcode lines
- Reduced hydration
- Loss of definition

Typical Patient Profile

- Over 50 years old
- Photoaged skin
- Smokers

Treatment Goal

Globally rejuvenate the lip area.

TherapDerma Solution

- Passion Lips + Amazing Lips

Why This Solution

Because Amazing Lips improves hydration and lip quality while Passion Lips provides comprehensive and progressive revitalisation of the entire lip region.

QUICK CLINICAL SUMMARY – LIPS

Concern	TherapDerma Solution
Thin Lips	<input checked="" type="checkbox"/> Passion Lips

QUICK DECISION GUIDE

I observe dry or dehydrated lips

- Amazing Lips

I observe wrinkled lips

- Amazing Lips

I observe barcode lines

- Amazing Lips

I observe loss of lip definition

- Passion Lips

I want complete lip revitalisation

- Passion Lips

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

TherapDerma – Where science meets Beauty

I want to rejuvenate the entire lip area

→ Passion Lips + Amazing Lips

AREA 8 – FACIAL CONTOURING

FACIAL CONTOURING PATIENT 1

Anatomical Area

Submental Area (Double Chin)

Concern

Mild Double Chin

What I Observe

- Mild fat accumulation beneath the chin
- Slight loss of jawline definition
- Less defined facial contour

Typical Patient Profile

- Patients aged 30–50 years
- Mild weight gain
- Genetic predisposition

Treatment Goal

Reduce the appearance of the double chin and improve facial definition.

TherapDerma Solution

Thin Face

Why This Solution

Because it was specifically developed for facial contouring protocols and the aesthetic treatment of localised fat deposits in the submental area.

FACIAL CONTOURING PATIENT 2

Anatomical Area

Submental Area (Double Chin)

Concern

Moderate Double Chin

What I Observe

- Visible fat accumulation
- Loss of the cervicomental angle
- Poorly defined jawline

Typical Patient Profile

- Patients with resistant localised fat deposits
- Adult men and women

Treatment Goal

Improve the facial profile and redefine the jawline contour.

TherapDerma Solution

Thin Face

Why This Solution

Because it is TherapDerma's specific solution for localised facial adiposity and facial contour improvement.

FACIAL CONTOURING PATIENT 3

Anatomical Area

Submental Area and Jawline

Concern

Double Chin Associated with Skin Laxity

What I Observe

- Fat accumulation
- Loss of firmness
- Tissue descent
- Reduced jawline definition

Typical Patient Profile

- Over 45 years old
- Facial ageing
- Post-weight-loss patients

Treatment Goal

Simultaneously improve facial contour and tissue firmness.

TherapDerma Solution

- California Look

Why This Solution

Because it is a progressive programme designed for comprehensive facial contouring and facial definition improvement in patients presenting multiple contributing factors.

FACIAL CONTOURING PATIENT 4

Anatomical Area

Facial Oval

Concern

Loss of Facial Definition

What I Observe

- Less defined facial contours
- Less prominent jawline
- Blurred transition between the face and neck

Typical Patient Profile

- Over 40 years old
- Early facial skin laxity

Treatment Goal

Restore a more defined and harmonious facial appearance.

TherapDerma Solution

- California Look

Why This Solution

Because it was designed for comprehensive facial contouring protocols and visual enhancement of facial definition.

FACIAL CONTOURING PATIENT 5

Anatomical Area

Facial Oval

Concern

Facial Contour Enhancement

What I Observe

- Poorly defined facial features
- Need for facial harmonisation
- Weakly defined facial contours

Typical Patient Profile

- Patients seeking to improve their facial profile
- Adult men and women of any age

Treatment Goal

Visually define the facial oval and improve facial proportions.

TherapDerma Solution

- ✓ California Look

Why This Solution

Because it is the TherapDerma solution specifically developed for facial contouring and facial profile harmonisation.

FACIAL CONTOURING PATIENT 6

Anatomical Area

Jawline and Lower Third of the Face

Concern

Age-Related Facial Contour Changes

What I Observe

- Skin laxity
- Loss of jawline definition
- Tissue descent
- Reduced dermal support

Typical Patient Profile

- Over 50 years old
- Photoaged skin
- Loss of elasticity

Treatment Goal

Improve facial firmness and redefine facial contours.

TherapDerma Solution

- ✓ Baby Face + California Look

Why This Solution

Because Baby Face helps improve firmness and dermal quality, while California Look contributes to facial contouring and profile harmonisation.

FACIAL CONTOURING PATIENT 7

Anatomical Area

Entire Facial Contour

Concern

Advanced Facial Contouring

What I Observe

- Double chin
- Skin laxity
- Loss of facial definition
- Global alteration of the facial oval

Typical Patient Profile

- Patients with moderate to advanced facial ageing

Treatment Goal

Globally improve the visual structure of the face.

TherapDerma Solution

- California Look

Why This Solution

Because it is TherapDerma’s most specific progressive programme for facial contouring and comprehensive improvement of facial definition.

QUICK CLINICAL SUMMARY – FACIAL CONTOURING

Concern	TherapDerma Solution
Mild Double Chin	<input checked="" type="checkbox"/> Thin Face
Moderate Double Chin	<input checked="" type="checkbox"/> Thin Face
Double Chin with Skin Laxity	<input checked="" type="checkbox"/> California Look
Loss of Facial Definition	<input checked="" type="checkbox"/> California Look
Facial Contour Enhancement	<input checked="" type="checkbox"/> California Look
Age-Related Facial Contour Changes	<input checked="" type="checkbox"/> Baby Face + California Look
Advanced Facial Contouring	<input checked="" type="checkbox"/> California Look

QUICK DECISION GUIDE

I observe localised fat beneath the chin

- Thin Face

I observe a moderate double chin

- Thin Face

I observe a double chin associated with skin laxity

- California Look

I observe loss of jawline definition

- California Look

I want to improve facial contours

- California Look

I observe ageing of the lower third of the face

- Baby Face + California Look

I want comprehensive facial contouring

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

AREA 9 – ACNE

ACNE PATIENT 1

Anatomical Area

Face

Concern

Active Acne

What I Observe

- Inflamed papules
- Pustules
- Redness
- Recurrent breakouts
- Excess sebum production

Typical Patient Profile

- Adolescents
- Young adults
- Hormonal imbalances
- Oily skin

Treatment Goal

Improve skin quality and promote normalisation of the cutaneous environment.

TherapDerma Solution

- ✓ Revital Mix

Why This Solution

Because it helps improve the appearance of acne-prone skin and promotes a more even-looking complexion.

ACNE PATIENT 2

Anatomical Area

Face

Concern

Moderate Inflammatory Acne

What I Observe

- Frequent breakouts
- Redness
- Visible papules and pustules
- Reactive skin

Typical Patient Profile

- Young adults
- Stress-related acne
- Hormonal imbalances

Treatment Goal

Improve the overall appearance of the skin and reduce acne-associated skin concerns.

TherapDerma Solution

- ✓ Revital Mix + Soft Skin

Why This Solution

Because Revital Mix helps improve skin uniformity while Soft Skin promotes comfort and balance in sensitive or reactive skin.

ACNE PATIENT 3

Anatomical Area

Face

Concern

Adult Acne Associated with Oxidative Stress

What I Observe

- Recurrent breakouts
- Dull skin
- Persistent inflammation
- Reduced skin quality

Typical Patient Profile

- Adults over 30 years old
- Stress
- Smoking
- Environmental exposure

Treatment Goal

Improve overall skin quality and reduce the impact of oxidative stress.

TherapDerma Solution

- Biorevital Detox

Why This Solution

Because it helps combat oxidative stress and promotes revitalisation of skin exposed to external aggressors.

ACNE PATIENT 4

Anatomical Area

Face

Concern

Blackheads

What I Observe

- Open comedones
- Blocked pores
- Excess shine
- Uneven texture

Typical Patient Profile

- Oily skin
- Adolescents
- Young adults

Treatment Goal

Improve the visual cleanliness of the skin and promote a more even texture.

TherapDerma Solution

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

Revital Mix

Why This Solution

Because it helps improve the appearance of skin affected by imperfections and concerns related to excess sebum.

ACNE PATIENT 5

Anatomical Area

Face

Concern

Enlarged Pores

What I Observe

- Visible pores
- Uneven texture
- Oily shine
- Thick-looking skin

Typical Patient Profile

- Oily skin
- Early photoageing
- History of acne

Treatment Goal

Improve the appearance of skin texture and skin uniformity.

TherapDerma Solution

Revital Mix

Why This Solution

Because it helps improve overall skin appearance and promotes a more refined and uniform-looking complexion.

ACNE PATIENT 6

Anatomical Area

Face

Concern

Oily Skin with Acne Tendency

What I Observe

- Excess sebum production
- Recurrent blemishes
- Enlarged pores
- Shiny skin appearance

Typical Patient Profile

- Adolescents
- Young adults
- Patients with seborrhoeic skin

Treatment Goal

Improve skin quality and promote a more balanced skin appearance.

TherapDerma Solution

- ✔ Revital Mix + Soft Skin

Why This Solution

Because Revital Mix helps improve skin uniformity while Soft Skin promotes balance and comfort in oily and reactive skin.

ACNE PATIENT 7

Anatomical Area

Face

Concern

Post-Acne Skin

What I Observe

- Residual redness
- Uneven skin texture
- Pigmentation marks
- Reduced skin quality

Typical Patient Profile

- Patients with a history of acne
- Young and adult patients

Treatment Goal

Improve overall skin quality and support skin recovery following acne.

TherapDerma Solution

- ✔ Soft Skin + Revital Mix

Why This Solution

Because Soft Skin helps improve skin comfort and quality, while Revital Mix contributes to a more even-looking complexion.

ACNE PATIENT 8

Anatomical Area

Face

Concern

Acne-Prone Sensitive Skin

What I Observe

- Frequent irritation
- Redness
- Acne lesions
- Reactive skin

Typical Patient Profile

- Sensitive skin types
- Reactive skin
- Patients prone to inflammatory acne

Treatment Goal

Improve skin comfort while supporting overall skin quality.

TherapDerma Solution

✔ Soft Skin

Why This Solution

Because it was specifically developed to improve skin comfort and support sensitive or reactive skin.

QUICK CLINICAL SUMMARY – ACNE

Concern	TherapDerma Solution
Active Acne	✔ Revital Mix
Moderate Inflammatory Acne	✔ Revital Mix + Soft Skin
Adult Acne Associated with Oxidative Stress	✔ Biorevital Detox
Blackheads	✔ Revital Mix
Enlarged Pores	✔ Revital Mix
Oily Skin with Acne Tendency	✔ Revital Mix + Soft Skin
Post-Acne Skin	✔ Soft Skin + Revital Mix
Acne-Prone Sensitive Skin	✔ Soft Skin

QUICK DECISION GUIDE

I observe active acne

→ ✔ Revital Mix

I observe inflammatory acne

→ ✔ Revital Mix + Soft Skin

I observe acne associated with oxidative stress

→ ✔ Biorevital Detox

I observe blackheads

→ ✔ Revital Mix

I observe enlarged pores

→ ✔ Revital Mix

I observe oily acne-prone skin

→ ✔ Revital Mix + Soft Skin

I observe post-acne skin concerns

→ ✔ Soft Skin + Revital Mix

I observe sensitive acne-prone skin

→ ✔ Soft Skin

AREA 10 – FACIAL FIBROSIS

FACIAL FIBROSIS PATIENT 1

Anatomical Area

Face

Concern

Post-Acne Fibrosis

What I Observe

- Irregular skin texture
- Areas of tissue hardening
- Depressed acne scars
- Reduced skin flexibility

Typical Patient Profile

- Patients with a history of inflammatory acne
- Long-standing acne scars

Treatment Goal

Improve skin quality and support tissue remodelling.

TherapDerma Solution

Scar Free

Why This Solution

Because it was specifically developed for scar and fibrosis management protocols, helping to improve skin texture and tissue quality.

FACIAL FIBROSIS PATIENT 2

Anatomical Area

Face

Concern

Fibrotic Acne Scars

What I Observe

- Depressed scars
- Fibrotic adhesions
- Uneven skin surface
- Visible textural irregularities

Typical Patient Profile

- Patients with moderate to severe acne scarring

Treatment Goal

Improve skin texture and support tissue regeneration.

TherapDerma Solution

Scar Free

Why This Solution

Because it is TherapDerma's specific solution for fibrosis and scar-management protocols, helping to improve the appearance of fibrotic skin changes.

FACIAL FIBROSIS PATIENT 3

Anatomical Area

Face

Concern

Post-Traumatic Facial Scarring

What I Observe

- Scar tissue
- Skin irregularities
- Areas of fibrosis
- Reduced tissue flexibility

Typical Patient Profile

- Patients with previous facial trauma
- Post-surgical patients

Treatment Goal

Improve tissue quality and support skin remodelling.

TherapDerma Solution

 Scar Free

Why This Solution

Because it was designed to support scar-management and fibrosis-improvement protocols, promoting better tissue quality and appearance.

FACIAL FIBROSIS PATIENT 4

Anatomical Area

Face

Concern

Post-Surgical Fibrosis

What I Observe

- Areas of tissue hardening
- Reduced tissue mobility
- Irregular skin texture
- Signs of scar tissue formation

Typical Patient Profile

- Post-surgical patients
- Patients following aesthetic procedures

Treatment Goal

Improve tissue flexibility and support tissue remodelling.

TherapDerma Solution

 Scar Free

Why This Solution

Because it is specifically intended for fibrosis-management protocols and improvement of tissue quality following surgical procedures.

FACIAL FIBROSIS PATIENT 5

Anatomical Area

Face

Concern

Fibrosis After Aesthetic Procedures

What I Observe

- Tissue irregularities
- Areas of firmness
- Reduced skin flexibility
- Uneven texture

Typical Patient Profile

- Patients following aesthetic treatments
- Post-procedure fibrosis

Treatment Goal

Improve tissue quality and support normal tissue remodelling.

TherapDerma Solution

Scar Free

Why This Solution

Because it was developed to support fibrosis-management protocols and improve the appearance and quality of affected tissues.

FACIAL FIBROSIS PATIENT 6

Anatomical Area

Face

Concern

Depressed Scarring

What I Observe

- Depressed skin areas
- Tissue irregularities
- Uneven skin surface
- Visible skin texture changes

Typical Patient Profile

- Post-acne patients
- Post-traumatic scar patients

Treatment Goal

Improve skin quality and support tissue regeneration.

TherapDerma Solution

Scar Free

Why This Solution

Because it is specifically designed for scar-management protocols and improvement of skin texture and tissue quality.

FACIAL FIBROSIS PATIENT 7

Anatomical Area

Face

Concern

Complex Facial Fibrosis

What I Observe

- Fibrotic tissue
- Scar adhesions
- Irregular texture
- Reduced tissue mobility

Typical Patient Profile

- Patients with long-standing fibrosis
- Multiple previous procedures

Treatment Goal

Improve tissue flexibility and overall skin quality.

TherapDerma Solution

- ✓ Scar Free + PDRN Renaissance

Why This Solution

Because Scar Free supports fibrosis management while PDRN Renaissance contributes to advanced tissue regeneration and improvement of dermal quality.

FACIAL FIBROSIS PATIENT 8

Anatomical Area

Face

Concern

Advanced Tissue Remodelling

What I Observe

- Extensive fibrosis
- Scar tissue formation
- Reduced skin quality
- Visible structural irregularities

Typical Patient Profile

- Severe fibrosis cases
- Advanced scar tissue changes

Treatment Goal

Maximise tissue regeneration and improve overall skin quality.

TherapDerma Solution

- ✓ Scar Free + Muraxin Gold

Why This Solution

Because Scar Free helps address fibrosis while Muraxin Gold provides advanced biomimetic support for deep dermal regeneration and tissue improvement.

QUICK CLINICAL SUMMARY – FACIAL FIBROSIS

Concern	TherapDerma Solution
Post-Acne Fibrosis	✔ Scar Free
Fibrotic Acne Scars	✔ Scar Free

KNOWLEDGE ★ INNOVATION ★ HARMONY

AREA 11 – NECK & DÉCOLLETAGE

NECK & DÉCOLLETAGE PATIENT 1

Anatomical Area

Neck

Concern

Horizontal Neck Lines

What I Observe

- Visible horizontal lines
- Loss of skin elasticity
- Early signs of ageing
- Reduced skin quality

Typical Patient Profile

- Over 35 years old
- Repetitive neck movements
- Early photoageing

Treatment Goal

Improve skin quality and soften the appearance of horizontal neck lines.

TherapDerma Solution

- Mesolifting

Why This Solution

Because it is specifically designed to improve skin firmness, elasticity and overall skin quality in areas affected by early ageing changes.

NECK & DÉCOLLETAGE PATIENT 2

Anatomical Area

Neck

Concern

Neck Skin Laxity

What I Observe

- Loss of firmness
- Sagging skin
- Reduced elasticity
- Less defined neck contour

Typical Patient Profile

- Over 45 years old
- Progressive skin ageing

Treatment Goal

Improve firmness and support the structural quality of the skin.

TherapDerma Solution

- Baby Face

Why This Solution

Because it helps improve dermal quality and promotes firmer, denser-looking skin.

NECK & DÉCOLLETAGE PATIENT 3

Anatomical Area

Décolletage

Concern

Décolletage Wrinkles

What I Observe

- Fine lines
- Visible wrinkles
- Photoageing signs
- Reduced skin quality

Typical Patient Profile

- Over 40 years old
- Frequent sun exposure
- Thin skin

Treatment Goal

Improve skin quality and reduce the appearance of wrinkles in the décolletage area.

TherapDerma Solution

- Mesolifting

Why This Solution

Because it is specifically formulated to improve elasticity, hydration and skin quality in ageing skin.

NECK & DÉCOLLETAGE PATIENT 4

Anatomical Area

Neck and Décolletage

Concern

Dehydrated Skin

What I Observe

- Dry skin
- Reduced radiance
- Fine dehydration lines
- Loss of skin comfort

Typical Patient Profile

- Adults of any age
- Frequent sun exposure
- Lack of hydration

Treatment Goal

Restore hydration and improve skin quality.

TherapDerma Solution

- Hyaluronic Acid 3.5% Low Viscosity

Why This Solution

TherapDerma – Where science meets Beauty

Because it provides intensive hydration and helps improve elasticity and overall skin appearance.

NECK & DÉCOLLETAGE PATIENT 5

Anatomical Area

Neck and Décolletage

Concern

Photoaged Skin

What I Observe

- Uneven skin tone
- Loss of radiance
- Fine wrinkles
- Visible signs of sun damage

Typical Patient Profile

- Over 40 years old
- History of cumulative sun exposure

Treatment Goal

Improve skin quality and support skin revitalisation.

TherapDerma Solution

- ✓ Anti-Aging with Vitamin C

Why This Solution

Because it provides antioxidant support and helps improve the appearance of photoaged skin.

NECK & DÉCOLLETAGE PATIENT 6

Anatomical Area

Neck and Décolletage

Concern

Ageing Skin

What I Observe

- Wrinkles
- Reduced firmness
- Loss of elasticity
- Declining skin quality

Typical Patient Profile

- Over 50 years old

Treatment Goal

Improve overall skin quality and support facial and cervical rejuvenation.

TherapDerma Solution

- ✓ PDRN Renaissance

Why This Solution

Because it is designed for advanced cellular regeneration and improvement of ageing skin quality.

NECK & DÉCOLLETAGE PATIENT 7

Anatomical Area

Neck and Décolletage

Concern

Advanced Skin Laxity

What I Observe

- Significant loss of firmness
- Tissue sagging
- Reduced elasticity
- Advanced ageing signs

Typical Patient Profile

- Over 55 years old
- Advanced skin ageing

Treatment Goal

Improve tissue support and enhance overall skin quality.

TherapDerma Solution

- Baby Face + Mesolifting

Why This Solution

Because Baby Face helps improve dermal quality while Mesolifting contributes to improved firmness and elasticity.

NECK & DÉCOLLETAGE PATIENT 8

Anatomical Area

Neck and Décolletage

Concern

Premium Neck & Décolletage Rejuvenation

What I Observe

- Wrinkles
- Skin laxity
- Reduced radiance
- Loss of elasticity
- Ageing skin quality

Typical Patient Profile

- Premium patients
- Patients seeking comprehensive rejuvenation

Treatment Goal

Achieve the highest possible improvement in skin quality and appearance.

TherapDerma Solution

- Golden Youth

Why This Solution

Because it represents TherapDerma's premium biomimetic solution for comprehensive skin rejuvenation and quality enhancement.

QUICK CLINICAL SUMMARY – NECK & DÉCOLLETAGE

KNOWLEDGE ★ INNOVATION ★ HARMONY

AREA 12 – BODY – LOCALISED ADIPOSITY

LOCALISED ADIPOSITY PATIENT 1

Anatomical Area

Abdomen

Concern

Localised Abdominal Fat

What I Observe

- Localised fat deposits
- Increased abdominal volume
- Difficulty reducing fat through diet and exercise
- Reduced body definition

Typical Patient Profile

- Men and women
- Sedentary lifestyle
- Metabolic changes

Treatment Goal

Improve body contour and reduce the appearance of localised adiposity.

TherapDerma Solution

 Thin Body

Why This Solution

Because it was specifically developed for body contouring protocols and the aesthetic treatment of localised adiposity.

LOCALISED ADIPOSITY PATIENT 2

Anatomical Area

Flanks

Concern

Love Handles

What I Observe

- Fat accumulation on the flanks
- Reduced waist definition
- Difficulty improving body contour

Typical Patient Profile

- Adult men and women
- Localised resistant fat deposits

Treatment Goal

Improve body proportions and redefine the waistline.

TherapDerma Solution

 Thin Body

Why This Solution

Because it is TherapDerma's specific solution for localised body adiposity and contour enhancement.

LOCALISED ADIPOSITY PATIENT 3

Anatomical Area

Abdomen and Waist

Concern

Generalised Localised Adiposity

What I Observe

- Multiple areas of fat accumulation
- Reduced body definition
- Increased body circumference

Typical Patient Profile

- Patients with localised fat in several body areas

Treatment Goal

Improve body contour and support aesthetic body remodelling.

TherapDerma Solution

- Miami Body

Why This Solution

Because it is designed for comprehensive body contouring protocols and improvement of overall body definition.

LOCALISED ADIPOSITY PATIENT 4

Anatomical Area

Thighs

Concern

Localised Fat Deposits

What I Observe

- Excess fat accumulation
- Reduced body definition
- Disproportion between upper and lower body

Typical Patient Profile

- Women
- Hormonal influence
- Genetic predisposition

Treatment Goal

Improve body contour and reduce the appearance of localised adiposity.

TherapDerma Solution

- Thin Body

Why This Solution

Because it was specifically developed for body contouring protocols and the management of localised adiposity.

LOCALISED ADIPOSITY PATIENT 5

Anatomical Area

Arms

Concern

Localised Arm Fat

What I Observe

- Fat accumulation in the upper arms
- Reduced arm definition
- Difficulty toning the area

Typical Patient Profile

- Men and women
- Weight fluctuations
- Progressive ageing

Treatment Goal

Improve arm contour and enhance body proportions.

TherapDerma Solution

- Thin Body

Why This Solution

Because it is specifically designed for the aesthetic management of localised adiposity and body contour improvement.

LOCALISED ADIPOSITY PATIENT 6

Anatomical Area

Multiple Body Areas

Concern

Body Contouring

What I Observe

- Localised fat deposits
- Reduced body definition
- Areas resistant to diet and exercise

Typical Patient Profile

- Men and women
- Patients seeking body reshaping

Treatment Goal

Improve body contour and support aesthetic body remodelling.

TherapDerma Solution

- Miami Body

Why This Solution

Because it was designed for comprehensive body contouring and improvement of overall body definition.

LOCALISED ADIPOSITY PATIENT 7

Anatomical Area

Abdomen and Waist

Concern

Fat Accumulation Following Weight Gain

What I Observe

- Increased abdominal circumference
- Fat deposits around the waist
- Reduced body definition

Typical Patient Profile

- Adults
- Sedentary lifestyle
- Recent weight gain

Treatment Goal

Improve body contour and support aesthetic reshaping.

TherapDerma Solution

- ✓ Thin Body + Miami Body

Why This Solution

Because Thin Body focuses on localised adiposity while Miami Body contributes to overall body contour enhancement.

LOCALISED ADIPOSITY PATIENT 8

Anatomical Area

Body

Concern

Advanced Body Remodelling

What I Observe

- Multiple areas of localised adiposity
- Reduced body definition
- Complex body contour concerns

Typical Patient Profile

- Patients seeking comprehensive body transformation

Treatment Goal

Achieve the highest possible improvement in body contour and definition.

TherapDerma Solution

- ✓ Miami Body + Golden Body Reshape

Why This Solution

Because Miami Body supports body contouring while Golden Body Reshape provides TherapDerma’s premium biomimetic approach to advanced body remodelling.

QUICK CLINICAL SUMMARY – LOCALISED ADIPOSITY

Concern	TherapDerma Solution
Localised Abdominal Fat	✓ Thin Body
Love Handles	✓ Thin Body
Generalised Localised Adiposity	✓ Miami Body

Concern	TherapDerma Solution
Localised Thigh Fat	✓ Thin Body
Localised Arm Fat	✓ Thin Body
Body Contouring	✓ Miami Body
Fat Accumulation Following Weight Gain	✓ Thin Body + Miami Body
Advanced Body Remodelling	✓ Miami Body + Golden Body Reshape

QUICK DECISION GUIDE

I observe localised abdominal fat

→ ✓ Thin Body

I observe love handles

→ ✓ Thin Body

I observe localised thigh fat

→ ✓ Thin Body

I observe localised arm fat

→ ✓ Thin Body

I want to improve overall body contour

→ ✓ Miami Body

I observe multiple areas of localised adiposity

→ ✓ Miami Body

I observe fat accumulation after weight gain

→ ✓ Thin Body + Miami Body

I want a premium body remodelling solution

→ ✓ Miami Body + Golden Body Reshape

AREA 13 – BODY – CELLULITE

CELLULITE PATIENT 1

Anatomical Area

Thighs

Concern

Oedematous Cellulite

What I Observe

- Fluid retention
- Swollen appearance
- Heavy legs
- Mild orange-peel texture

Typical Patient Profile

- Women
- Circulatory concerns
- Fluid retention

Treatment Goal

Improve skin appearance and support reduction of fluid retention.

TherapDerma Solution

- Fat Preventor

Why This Solution

Because it was specifically developed for protocols aimed at improving body contour and supporting patients presenting fluid-retention-related aesthetic concerns.

CELLULITE PATIENT 2

Anatomical Area

Thighs and Buttocks

Concern

Adipose Cellulite

What I Observe

- Soft cellulite
- Visible orange-peel appearance
- Localised fat accumulation
- Reduced skin smoothness

Typical Patient Profile

- Women
- Localised adiposity
- Sedentary lifestyle

Treatment Goal

Improve skin appearance and support body contour enhancement.

TherapDerma Solution

- Thin Body

Why This Solution

Because it is specifically designed for localised adiposity and body contour improvement, frequently associated with adipose cellulite.

CELLULITE PATIENT 3

Anatomical Area

Thighs and Buttocks

Concern

Fibrous Cellulite

What I Observe

- Hard cellulite
- Pain on palpation
- Marked skin irregularities
- Pronounced orange-peel appearance

Typical Patient Profile

- Long-standing cellulite
- Women over 30 years old

Treatment Goal

Improve skin quality and support tissue remodelling.

TherapDerma Solution

- California Look

Why This Solution

Because it is a progressive programme designed to improve body contour and support aesthetic remodelling in more complex body conditions.

CELLULITE PATIENT 4

Anatomical Area

Thighs

Concern

Flaccid Cellulite

What I Observe

- Skin laxity
- Reduced firmness
- Mild cellulite appearance
- Poor skin support

Typical Patient Profile

- Over 40 years old
- Weight fluctuations
- Progressive ageing

Treatment Goal

Improve skin firmness and overall skin quality.

TherapDerma Solution

✓ Miami Body

Why This Solution

Because it is specifically designed to improve body contour and enhance skin quality in patients presenting body skin laxity.

CELLULITE PATIENT 5**Anatomical Area**

Buttocks and Thighs

Concern

Advanced Cellulite

What I Observe

- Visible cellulite at rest
- Multiple cellulite patterns
- Reduced skin quality
- Altered body contour

Typical Patient Profile

- Long-standing cellulite
- Multiple contributing factors

Treatment Goal

Improve skin appearance and support comprehensive body remodelling.

TherapDerma Solution

✓ California Look + Miami Body

Why This Solution

Because California Look contributes to body remodelling while Miami Body helps improve skin quality and body contour.

CELLULITE PATIENT 6**Anatomical Area**

Legs

Concern

Cellulite Associated with Fluid Retention

What I Observe

- Swelling
- Heavy legs
- Mild cellulite
- Signs of fluid accumulation

Typical Patient Profile

- Women
- Sedentary lifestyle
- Circulatory concerns

Treatment Goal

Improve skin appearance and support reduction of fluid retention.

TherapDerma Solution

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

✔ Fat Preventor

Why This Solution

Because it was developed to support body contour improvement in patients presenting fluid-retention-related aesthetic concerns.

CELLULITE PATIENT 7

Anatomical Area

Thighs and Buttocks

Concern

Cellulite Associated with Localised Adiposity

What I Observe

- Visible cellulite
- Localised fat deposits
- Reduced skin smoothness
- Altered body contour

Typical Patient Profile

- Women
- Localised adiposity

Treatment Goal

Improve body contour and skin appearance.

TherapDerma Solution

✔ Thin Body + Miami Body

Why This Solution

Because Thin Body addresses localised adiposity while Miami Body contributes to overall body contour improvement.

CELLULITE PATIENT 8

Anatomical Area

Thighs and Buttocks

Concern

Premium Cellulite Management

What I Observe

- Visible cellulite
- Skin laxity
- Reduced skin quality
- Complex body contour concerns

Typical Patient Profile

- Premium patients
- Patients seeking comprehensive body improvement

Treatment Goal

Achieve the highest possible improvement in skin quality and body contour.

TherapDerma Solution

✔ Golden Body Reshape + Miami Body

Why This Solution

Because Golden Body Reshape represents TherapDerma’s premium biomimetic body solution while Miami Body complements overall body contour enhancement.

QUICK CLINICAL SUMMARY – CELLULITE

Concern	TherapDerma Solution
Oedematous Cellulite	✔ Fat Preventor
Adipose Cellulite	✔ Thin Body
Fibrous Cellulite	✔ California Look
Flaccid Cellulite	✔ Miami Body
Advanced Cellulite	✔ California Look + Miami Body
Cellulite Associated with Fluid Retention	✔ Fat Preventor
Cellulite Associated with Localised Adiposity	✔ Thin Body + Miami Body
Premium Cellulite Management	✔ Golden Body Reshape + Miami Body

QUICK DECISION GUIDE

I observe oedematous cellulite

→ ✔ Fat Preventor

I observe adipose cellulite

→ ✔ Thin Body

I observe fibrous cellulite

→ ✔ California Look

I observe flaccid cellulite

→ ✔ Miami Body

I observe advanced cellulite

→ ✔ California Look + Miami Body

I observe cellulite associated with fluid retention

→ ✔ Fat Preventor

I observe cellulite associated with localised adiposity

→ ✔ Thin Body + Miami Body

I want a premium cellulite solution

→ ✔ Golden Body Reshape + Miami Body

AREA 14 – BODY – SKIN LAXITY

SKIN LAXITY PATIENT 1

Anatomical Area

Abdomen

Concern

Mild Skin Laxity

What I Observe

- Mild loss of firmness
- Reduced skin tension
- Early signs of tissue relaxation

Typical Patient Profile

- Post-pregnancy patients
- Mild weight fluctuations
- Early body ageing

Treatment Goal

Improve skin firmness and support tissue quality.

TherapDerma Solution

- Miami Body

Why This Solution

Because it was specifically designed to improve body skin quality and support firmer-looking skin.

SKIN LAXITY PATIENT 2

Anatomical Area

Arms

Concern

Flaccid Arms

What I Observe

- Loss of firmness
- Tissue laxity
- Reduced skin support
- Age-related skin changes

Typical Patient Profile

- Over 40 years old
- Weight fluctuations

Treatment Goal

Improve skin quality and firmness.

TherapDerma Solution

- Miami Body

Why This Solution

Because it helps improve skin quality and body contour in areas affected by skin laxity.

SKIN LAXITY PATIENT 3

Anatomical Area

Inner Thighs

Concern

Skin Laxity of the Thighs

What I Observe

- Reduced firmness
- Skin looseness
- Loss of tissue support

Typical Patient Profile

- Women
- Post-weight-loss patients
- Progressive ageing

Treatment Goal

Improve skin firmness and support body contour enhancement.

TherapDerma Solution

- Miami Body

Why This Solution

Because it is specifically formulated to improve body skin quality and support firmer, more toned-looking skin.

SKIN LAXITY PATIENT 4

Anatomical Area

Abdomen

Concern

Post-Pregnancy Skin Laxity

What I Observe

- Loose skin
- Reduced tissue support
- Stretching of the abdominal tissues
- Loss of firmness

Typical Patient Profile

- Postpartum women
- Multiple pregnancies

Treatment Goal

Improve skin quality and support tissue recovery.

TherapDerma Solution

- Miami Body

Why This Solution

Because it is specifically designed to improve skin quality and body contour in areas affected by tissue stretching and loss of firmness.

SKIN LAXITY PATIENT 5

Anatomical Area

Body

Concern

Post-Weight-Loss Skin Laxity

What I Observe

- Loose skin
- Reduced tissue support
- Altered body contour
- Loss of skin density

Typical Patient Profile

- Significant weight-loss patients
- Post-bariatric patients

Treatment Goal

Improve skin quality and support body contour enhancement.

TherapDerma Solution

- Miami Body + California Look

Why This Solution

Because Miami Body improves skin quality while California Look supports body contour remodelling and tissue harmonisation.

SKIN LAXITY PATIENT 6

Anatomical Area

Body

Concern

Age-Related Skin Laxity

What I Observe

- Generalised loss of firmness
- Reduced elasticity
- Progressive tissue relaxation

Typical Patient Profile

- Over 50 years old
- Natural ageing process

Treatment Goal

Improve skin quality and support tissue firmness.

TherapDerma Solution

- Golden Body Reshape

Why This Solution

Because it represents TherapDerma’s premium biomimetic solution for improving body skin quality and supporting tissue firmness.

SKIN LAXITY PATIENT 7

Anatomical Area

Body

Concern

Moderate to Advanced Skin Laxity

What I Observe

- Significant loss of firmness
- Altered body contour
- Tissue relaxation
- Reduced skin quality

Typical Patient Profile

- Advanced ageing
- Post-weight-loss patients

Treatment Goal

Improve skin quality and support body contour restoration.

TherapDerma Solution

- ✓ Miami Body + Golden Body Reshape

Why This Solution

Because Miami Body improves skin quality while Golden Body Reshape provides advanced biomimetic support for tissue improvement.

SKIN LAXITY PATIENT 8

Anatomical Area

Body

Concern

Comprehensive Body Firming

What I Observe

- Generalised skin laxity
- Reduced firmness
- Multiple affected body areas

Typical Patient Profile

- Patients seeking comprehensive body rejuvenation

Treatment Goal

Achieve the highest possible improvement in skin quality and body firmness.

TherapDerma Solution

- ✓ Miami Body + Golden Body Reshape

Why This Solution

Because this combination provides a comprehensive approach to body skin quality improvement and support of tissue firmness.

QUICK CLINICAL SUMMARY – SKIN LAXITY

AREA 15 – BODY – BODY REMODELLING

BODY REMODELLING PATIENT 1

Anatomical Area

Body

Concern

Lack of Body Definition

What I Observe

- Poorly defined body contours
- Reduced muscle visibility
- Lack of body harmony

Typical Patient Profile

- Men and women
- Patients seeking aesthetic body enhancement

Treatment Goal

Improve body contour and visual definition.

TherapDerma Solution

- Miami Body

Why This Solution

Because it was specifically developed for body contouring and body remodelling protocols.

BODY REMODELLING PATIENT 2

Anatomical Area

Abdomen and Waist

Concern

Body Contouring

What I Observe

- Altered body proportions
- Reduced waist definition
- Localised contour irregularities

Typical Patient Profile

- Patients seeking body reshaping

Treatment Goal

Improve body harmony and overall contour.

TherapDerma Solution

- California Look

Why This Solution

Because it is designed to support aesthetic body remodelling and contour harmonisation.

BODY REMODELLING PATIENT 3

Anatomical Area

Multiple Body Areas

Concern

Global Body Remodelling

What I Observe

- Multiple contour concerns
- Reduced body definition
- Areas requiring aesthetic improvement

Typical Patient Profile

- Patients seeking comprehensive body transformation

Treatment Goal

Improve body proportions and overall aesthetic appearance.

TherapDerma Solution

- Miami Body + California Look

Why This Solution

Because Miami Body improves body contour while California Look contributes to overall body harmonisation.

BODY REMODELLING PATIENT 4

Anatomical Area

Abdomen

Concern

Post-Weight-Loss Body Contour Changes

What I Observe

- Altered body contour
- Loss of tissue support
- Reduced body definition
- Excess skin

Typical Patient Profile

- Significant weight-loss patients
- Post-bariatric patients

Treatment Goal

Improve body contour and support aesthetic body harmonisation.

TherapDerma Solution

- California Look

Why This Solution

Because it was specifically developed for body contouring and body remodelling protocols in patients presenting complex contour concerns.

BODY REMODELLING PATIENT 5

Anatomical Area

Body

Concern

Body Remodelling After GLP-1 Treatment

What I Observe

- Rapid body changes
- Loss of tissue support
- Reduced skin quality
- Altered body proportions

Typical Patient Profile

- Patients following GLP-1 therapies
- Significant weight-loss patients

Treatment Goal

Support body contour improvement and enhance overall tissue quality.

TherapDerma Solution

- ✓ California Look + Miami Body

Why This Solution

Because California Look contributes to body contour harmonisation while Miami Body helps improve skin quality and body definition.

BODY REMODELLING PATIENT 6

Anatomical Area

Body

Concern

Athletic Body Definition

What I Observe

- Desire for greater body definition
- Good baseline body composition
- Need for contour refinement

Typical Patient Profile

- Active individuals
- Fitness-oriented patients

Treatment Goal

Enhance body contour and improve visual definition.

TherapDerma Solution

- ✓ Fitness Body

Why This Solution

Because it was specifically developed to support body definition and aesthetic enhancement in patients seeking a more athletic appearance.

BODY REMODELLING PATIENT 7

Anatomical Area

Body

Concern

Advanced Body Contouring

What I Observe

- Multiple contour concerns
- Reduced body harmony

- Need for comprehensive body improvement

Typical Patient Profile

- Patients seeking significant body transformation

Treatment Goal

Improve overall body contour and aesthetic proportions.

TherapDerma Solution

- ✓ California Look + Miami Body

Why This Solution

Because both solutions work synergistically to improve body contour, harmonisation and overall aesthetic appearance.

BODY REMODELLING PATIENT 8

Anatomical Area

Body

Concern

Premium Body Remodelling

What I Observe

- Complex body contour concerns
- Reduced skin quality
- Desire for comprehensive body enhancement

Typical Patient Profile

- Premium patients
- Patients seeking maximum body improvement

Treatment Goal

Achieve the highest possible improvement in body contour, skin quality and overall body appearance.

TherapDerma Solution

- ✓ Golden Body Reshape + California Look

Why This Solution

Because Golden Body Reshape provides premium biomimetic support while California Look contributes to advanced body contour harmonisation.

QUICK CLINICAL SUMMARY – BODY REMODELLING

I want a premium body remodelling solution

→ Golden Body Reshape + California Look

AREA 16 – BODY – BODY DETOX

BODY DETOX PATIENT 1

Anatomical Area

Body

Concern

Fluid Retention

What I Observe

- Swelling
- Heavy legs
- Increased body volume
- Reduced body definition

Typical Patient Profile

- Women
- Sedentary lifestyle
- Hormonal fluctuations

Treatment Goal

Support body detoxification and improve the appearance associated with fluid retention.

TherapDerma Solution

- Fat Preventor

Why This Solution

Because it was specifically designed for body detoxification and contour-improvement protocols in patients presenting fluid-retention-related concerns.

BODY DETOX PATIENT 2

Anatomical Area

Body

Concern

Heavy Legs

What I Observe

- Sensation of heaviness
- Mild swelling
- Reduced comfort
- Signs associated with fluid accumulation

Typical Patient Profile

- Women
- Standing occupations
- Sedentary habits

Treatment Goal

Improve body comfort and support body detoxification.

TherapDerma Solution

- Fat Preventor

Why This Solution

TherapDerma – Where science meets Beauty

Because it helps support protocols aimed at improving body comfort and fluid-retention-related aesthetic concerns.

BODY DETOX PATIENT 3

Anatomical Area

Body

Concern

General Body Detoxification

What I Observe

- Reduced body vitality
- Fluid retention
- Poor body definition
- Tired appearance

Typical Patient Profile

- Sedentary lifestyle
- Stress
- Unhealthy lifestyle habits

Treatment Goal

Support body revitalisation and improve overall body appearance.

TherapDerma Solution

- ✓ Biorevital Detox

Why This Solution

Because it was developed to support detoxification and revitalisation protocols for the entire body.

BODY DETOX PATIENT 4

Anatomical Area

Body

Concern

Body Congestion

What I Observe

- Puffiness
- Fluid retention
- Reduced body definition
- Tired appearance

Typical Patient Profile

- Sedentary individuals
- Stress-related lifestyle
- Poor dietary habits

Treatment Goal

Support detoxification and improve overall body appearance.

TherapDerma Solution

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

Biorevital Detox

Why This Solution

Because it helps support detoxification protocols and promotes revitalisation of the body's tissues.

BODY DETOX PATIENT 5

Anatomical Area

Body

Concern

Detoxification After Weight Gain

What I Observe

- Fluid retention
- Increased body volume
- Reduced body definition
- Feeling of heaviness

Typical Patient Profile

- Recent weight gain
- Sedentary lifestyle

Treatment Goal

Support body detoxification and improve body contour appearance.

TherapDerma Solution

Fat Preventor + Biorevital Detox

Why This Solution

Because Fat Preventor helps address fluid-retention-related concerns while Biorevital Detox contributes to overall body revitalisation.

BODY DETOX PATIENT 6

Anatomical Area

Body

Concern

Body Fatigue

What I Observe

- Reduced vitality
- Tired appearance
- Signs of physical exhaustion
- Poor body condition

Typical Patient Profile

- Busy professionals
- High stress levels
- Lack of rest

Treatment Goal

Improve overall body vitality and support revitalisation.

TherapDerma Solution

 info@therapmedic.com  www.therapmedic.com US USA: +1-786-546-8347 PT Portugal: +351-910-645-779

Biorevital Detox

Why This Solution

Because it was specifically developed to support revitalisation and detoxification protocols for patients experiencing physical fatigue.

BODY DETOX PATIENT 7

Anatomical Area

Body

Concern

Oxidative Stress

What I Observe

- Reduced skin quality
- Tired appearance
- Signs of accelerated ageing
- Poor tissue vitality

Typical Patient Profile

- Smokers
- Chronic stress
- Environmental exposure

Treatment Goal

Support detoxification and improve overall tissue quality.

TherapDerma Solution

Anti-Aging with Vitamin C + Biorevital Detox

Why This Solution

Because Anti-Aging with Vitamin C provides antioxidant support while Biorevital Detox contributes to body revitalisation and detoxification.

BODY DETOX PATIENT 8

Anatomical Area

Body

Concern

Premium Body Detox

What I Observe

- Fluid retention
- Reduced vitality
- Poor body definition
- Signs of accumulated stress

Typical Patient Profile

- Premium patients
- Patients seeking comprehensive body revitalisation

Treatment Goal

Achieve the highest possible level of body revitalisation and detoxification.

TherapDerma Solution

✓ Biorevital Detox + Golden Body Reshape

Why This Solution

Because Biorevital Detox supports detoxification while Golden Body Reshape enhances overall body quality through advanced biomimetic technology.

QUICK CLINICAL SUMMARY – BODY DETOX

Concern	TherapDerma Solution
Fluid Retention	✓ Fat Preventor
Heavy Legs	✓ Fat Preventor
General Body Detoxification	✓ Biorevital Detox
Body Congestion	✓ Biorevital Detox

QUICK DECISION GUIDE

I observe fluid retention

→ ✓ Fat Preventor

I observe heavy legs

→ ✓ Fat Preventor

I want general body detoxification

→ ✓ Biorevital Detox

I observe body congestion

→ ✓ Biorevital Detox

I observe fluid retention after weight gain

→ ✓ Fat Preventor + Biorevital Detox

I observe signs of body fatigue

→ ✓ Biorevital Detox

I observe oxidative stress

→ ✓ Anti-Aging with Vitamin C + Biorevital Detox

I want a premium body detoxification solution

→ ✓ Biorevital Detox + Golden Body Reshape

AREA 17 – BODY – POST GLP-1

POST GLP-1 PATIENT 1

Anatomical Area

Face and Body

Concern

Loss of Tissue Volume

What I Observe

- Loss of facial fullness
- Reduced tissue support
- Altered body proportions
- Thinner appearance

Typical Patient Profile

- Patients following GLP-1 therapies
- Significant weight loss

Treatment Goal

Improve tissue quality and support aesthetic restoration.

TherapDerma Solution

- ✓ PDRN Renaissance

Why This Solution

Because it is specifically designed to support tissue regeneration and improve skin quality in patients experiencing volume and tissue-quality changes following weight loss.

POST GLP-1 PATIENT 2

Anatomical Area

Face

Concern

Facial Volume Loss

What I Observe

- Hollow appearance
- Reduced facial support
- More pronounced ageing signs
- Loss of facial vitality

Typical Patient Profile

- Significant weight-loss patients
- Post-GLP-1 treatments

Treatment Goal

Support tissue regeneration and improve facial quality.

TherapDerma Solution

- ✓ Muraxin Gold

Why This Solution

Because it provides advanced biomimetic support for tissue regeneration and dermal quality improvement.

POST GLP-1 PATIENT 3**Anatomical Area**

Body

Concern

Skin Laxity After Rapid Weight Loss

What I Observe

- Loose skin
- Reduced firmness
- Altered body contour
- Loss of tissue support

Typical Patient Profile

- Patients following GLP-1 therapies
- Rapid weight-loss patients

Treatment Goal

Improve skin quality and support body contour restoration.

TherapDerma Solution

- ✓ Miami Body

Why This Solution

Because it was specifically developed to improve body skin quality and support tissue firmness.

POST GLP-1 PATIENT 4**Anatomical Area**

Face and Neck

Concern

Loss of Skin Quality

What I Observe

- Thin skin
- Reduced elasticity
- Loss of radiance
- More visible signs of ageing

Typical Patient Profile

- Patients after significant weight loss
- Post-GLP-1 treatments

Treatment Goal

Improve skin quality and support tissue regeneration.

TherapDerma Solution

- ✓ PDRN Renaissance

Why This Solution

Because it was specifically developed to improve dermal quality and support advanced tissue regeneration.

POST GLP-1 PATIENT 5

Anatomical Area

Face and Body

Concern

Generalised Tissue Weakness

What I Observe

- Loss of tissue support
- Reduced firmness
- Altered body and facial appearance
- Skin quality decline

Typical Patient Profile

- Patients with rapid weight loss
- Post-GLP-1 patients

Treatment Goal

Support tissue recovery and improve overall skin quality.

TherapDerma Solution

- PDRN Renaissance + Miami Body

Why This Solution

Because PDRN Renaissance improves tissue quality while Miami Body supports skin firmness and body contour improvement.

POST GLP-1 PATIENT 6

Anatomical Area

Face

Concern

Advanced Facial Ageing Following Weight Loss

What I Observe

- Hollow appearance
- Thin skin
- Reduced dermal support
- Pronounced facial ageing

Typical Patient Profile

- Patients with substantial weight loss
- Mature patients

Treatment Goal

Improve dermal quality and support facial rejuvenation.

TherapDerma Solution

- Muraxin Gold + PDRN Renaissance

Why This Solution

Because Muraxin Gold provides advanced biomimetic regeneration while PDRN Renaissance supports comprehensive tissue recovery.

POST GLP-1 PATIENT 7

Anatomical Area

Body

Concern

Body Contour Alterations

What I Observe

- Loss of body harmony
- Loose skin
- Reduced tissue support
- Altered body proportions

Typical Patient Profile

- Significant weight-loss patients
- Post-GLP-1 treatments

Treatment Goal

Improve body contour and support tissue quality.

TherapDerma Solution

- ✓ California Look + Miami Body

Why This Solution

Because California Look contributes to body contour harmonisation while Miami Body improves skin quality and body appearance.

POST GLP-1 PATIENT 8

Anatomical Area

Face and Body

Concern

Comprehensive Post GLP-1 Recovery

What I Observe

- Facial volume loss
- Skin laxity
- Reduced tissue quality
- Generalised ageing appearance

Typical Patient Profile

- Patients seeking full post-weight-loss restoration

Treatment Goal

Achieve comprehensive regeneration and aesthetic recovery.

TherapDerma Solution

- ✓ Muraxin Gold + PDRN Renaissance + Miami Body

Why This Solution

Because these solutions provide a complete approach to tissue regeneration, skin quality improvement and body contour restoration following significant weight loss.

QUICK CLINICAL SUMMARY – POST GLP-1

Concern

Loss of Tissue Volume

TherapDerma Solution

- ✓ PDRN Renaissance

TherapDerma – Where science meets Beauty

Concern	TherapDerma Solution
Facial Volume Loss	✓ Muraxin Gold
Skin Laxity After Rapid Weight Loss	✓ Miami Body
Loss of Skin Quality	✓ PDRN Renaissance
Generalised Tissue Weakness	✓ PDRN Renaissance + Miami Body
Advanced Facial Ageing Following Weight Loss	✓ Muraxin Gold + PDRN Renaissance
Body Contour Alterations	✓ California Look + Miami Body
Comprehensive Post GLP-1 Recovery	✓ Muraxin Gold + PDRN Renaissance + Miami Body

QUICK DECISION GUIDE

I observe loss of tissue volume

→ ✓ PDRN Renaissance

I observe facial volume loss

→ ✓ Muraxin Gold

I observe skin laxity after rapid weight loss

→ ✓ Miami Body

I observe loss of skin quality

→ ✓ PDRN Renaissance

I observe generalised tissue weakness

→ ✓ PDRN Renaissance + Miami Body

I observe advanced facial ageing after weight loss

→ ✓ Muraxin Gold + PDRN Renaissance

I observe body contour alterations

→ ✓ California Look + Miami Body

I want comprehensive post GLP-1 recovery

→ ✓ Muraxin Gold + PDRN Renaissance + Miami Body

AREA 18 – BODY – FIBROSIS

FIBROSIS PATIENT 1

Anatomical Area

Abdomen

Concern

Post-Liposuction Fibrosis

What I Observe

- Tissue hardening
- Nodules
- Uneven skin surface
- Reduced tissue mobility

Typical Patient Profile

- Post-liposuction patients
- Post-body contouring procedures

Treatment Goal

Improve tissue quality and support fibrosis remodelling.

TherapDerma Solution

Scar Free

Why This Solution

Because it was specifically developed for fibrosis-management and scar-remodelling protocols.

FIBROSIS PATIENT 2

Anatomical Area

Body

Concern

Post-Surgical Fibrosis

What I Observe

- Areas of hardening
- Scar tissue formation
- Tissue adhesions
- Reduced flexibility

Typical Patient Profile

- Post-surgical patients

Treatment Goal

Support tissue remodelling and improve tissue quality.

TherapDerma Solution

Scar Free

Why This Solution

Because it is specifically intended for fibrosis-management protocols and improvement of tissue quality following surgical procedures.

FIBROSIS PATIENT 3

Anatomical Area

Body

Concern

Fibrosis Following Aesthetic Procedures

What I Observe

- Tissue irregularities
- Areas of firmness
- Skin texture changes
- Reduced tissue mobility

Typical Patient Profile

- Post-aesthetic procedure patients

Treatment Goal

Improve tissue quality and support tissue recovery.

TherapDerma Solution

- Scar Free

Why This Solution

Because it helps support fibrosis-remodelling protocols and improve the quality of affected tissues.

FIBROSIS PATIENT 4

Anatomical Area

Abdomen

Concern

Fibrosis After Abdominoplasty

What I Observe

- Tissue hardening
- Areas of reduced mobility
- Scar adhesions
- Uneven skin surface

Typical Patient Profile

- Post-abdominoplasty patients
- Body contouring surgery patients

Treatment Goal

Improve tissue flexibility and support fibrosis remodelling.

TherapDerma Solution

- Scar Free

Why This Solution

Because it was specifically designed for scar-management and fibrosis-remodelling protocols following surgical procedures.

FIBROSIS PATIENT 5

Anatomical Area

Body

Concern

Chronic Fibrosis

What I Observe

- Long-standing fibrosis
- Dense tissue
- Reduced elasticity
- Persistent tissue irregularities

Typical Patient Profile

- Long-term fibrosis cases
- Multiple previous procedures

Treatment Goal

Improve tissue quality and support remodelling of fibrotic tissues.

TherapDerma Solution

- Scar Free

Why This Solution

Because it is TherapDerma’s dedicated solution for fibrosis-management protocols and tissue-quality improvement.

FIBROSIS PATIENT 6

Anatomical Area

Body

Concern

Fibrosis with Tissue Adhesions

What I Observe

- Tissue fixation
- Reduced mobility
- Fibrotic bands
- Uneven tissue texture

Typical Patient Profile

- Post-surgical patients
- Post-traumatic fibrosis

Treatment Goal

Improve tissue flexibility and support tissue recovery.

TherapDerma Solution

- Scar Free

Why This Solution

Because it helps support fibrosis-remodelling protocols and improve the quality of affected tissues.

FIBROSIS PATIENT 7

Anatomical Area

Body

Concern

Complex Fibrosis

What I Observe

- Extensive fibrosis
- Tissue hardening
- Scar tissue formation
- Reduced tissue quality

Typical Patient Profile

- Advanced fibrosis cases
- Multiple previous interventions

Treatment Goal

Improve tissue quality and support advanced tissue regeneration.

TherapDerma Solution

- ✓ Scar Free + PDRN Renaissance

Why This Solution

Because Scar Free supports fibrosis management while PDRN Renaissance contributes to advanced tissue regeneration and dermal quality improvement.

FIBROSIS PATIENT 8

Anatomical Area

Body

Concern

Advanced Fibrosis Remodelling

What I Observe

- Extensive fibrosis
- Tissue adhesions
- Reduced tissue flexibility
- Significant tissue-quality changes

Typical Patient Profile

- Severe fibrosis cases
- Chronic fibrosis

Treatment Goal

Maximise tissue regeneration and support tissue recovery.

TherapDerma Solution

- ✓ Scar Free + Muraxin Gold

Why This Solution

Because Scar Free helps address fibrosis while Muraxin Gold provides advanced biomimetic support for deep tissue regeneration.

QUICK CLINICAL SUMMARY – FIBROSIS

Concern

Post-Liposuction Fibrosis

TherapDerma Solution

- ✓ Scar Free

Concern	TherapDerma Solution
Post-Surgical Fibrosis	✔ Scar Free
Fibrosis Following Aesthetic Procedures	✔ Scar Free
Fibrosis After Abdominoplasty	✔ Scar Free
Chronic Fibrosis	✔ Scar Free
Fibrosis with Tissue Adhesions	✔ Scar Free
Complex Fibrosis	✔ Scar Free + PDRN Renaissance
Advanced Fibrosis Remodelling	✔ Scar Free + Muraxin Gold

QUICK DECISION GUIDE

I observe post-liposuction fibrosis

→ ✔ Scar Free

I observe post-surgical fibrosis

→ ✔ Scar Free

I observe fibrosis following aesthetic procedures

→ ✔ Scar Free

I observe fibrosis after abdominoplasty

→ ✔ Scar Free

I observe chronic fibrosis

→ ✔ Scar Free

I observe fibrosis with tissue adhesions

→ ✔ Scar Free

I observe complex fibrosis

→ ✔ Scar Free + PDRN Renaissance

I want maximum fibrosis remodelling and tissue regeneration

→ ✔ Scar Free + Muraxin Gold

AREA 19 – BODY – STRETCH MARKS

STRETCH MARKS PATIENT 1

Anatomical Area

Abdomen

Concern

Recent Stretch Marks (Striae Rubrae)

What I Observe

- Red or pink stretch marks
- Early-stage lesions
- Signs of active tissue stretching
- Visible vascular component

Typical Patient Profile

- Adolescents
- Pregnancy
- Rapid weight gain
- Bodybuilding patients

Treatment Goal

Improve skin quality and support the appearance of early stretch marks.

TherapDerma Solution

- ✓ Repaired Skin

Why This Solution

Because it was specifically developed to support skin regeneration and improve the appearance of recently formed stretch marks.

STRETCH MARKS PATIENT 2

Anatomical Area

Abdomen and Thighs

Concern

Mature Stretch Marks (Striae Albae)

What I Observe

- White stretch marks
- Established lesions
- Reduced skin uniformity
- Visible dermal damage

Typical Patient Profile

- Long-standing stretch marks
- Post-pregnancy patients

Treatment Goal

Improve skin quality and support dermal regeneration.

TherapDerma Solution

- ✓ Repaired Skin

Why This Solution

Because it helps support tissue regeneration and improve the appearance of mature stretch marks.

STRETCH MARKS PATIENT 3

Anatomical Area

Body

Concern

Stretch Marks After Pregnancy

What I Observe

- Stretch marks on the abdomen
- Skin laxity
- Reduced skin quality
- Tissue stretching changes

Typical Patient Profile

- Postpartum women

Treatment Goal

Improve skin quality and support tissue recovery.

TherapDerma Solution

- Repaired Skin

Why This Solution

Because it is specifically intended for skin-repair protocols and improvement of tissue quality following stretching-related changes.

STRETCH MARKS PATIENT 4

Anatomical Area

Thighs

Concern

Stretch Marks Associated with Weight Gain

What I Observe

- Stretch marks following body volume increase
- Reduced skin uniformity
- Visible dermal alterations

Typical Patient Profile

- Rapid weight gain
- Adolescents
- Adults with significant body changes

Treatment Goal

Improve skin quality and support dermal regeneration.

TherapDerma Solution

- Repaired Skin

Why This Solution

Because it was specifically developed to support skin-repair protocols and improve the appearance of stretch marks.

STRETCH MARKS PATIENT 5

Anatomical Area

Buttocks and Thighs

Concern

Hormonal Stretch Marks

What I Observe

- Stretch marks in hormonally influenced areas
- Reduced skin quality
- Altered skin texture

Typical Patient Profile

- Adolescents
- Hormonal changes
- Women

Treatment Goal

Improve skin quality and support tissue regeneration.

TherapDerma Solution

- Repaired Skin

Why This Solution

Because it helps support dermal regeneration and improve the appearance of stretch-mark-affected skin.

STRETCH MARKS PATIENT 6

Anatomical Area

Body

Concern

Multiple Stretch Marks

What I Observe

- Stretch marks in several anatomical areas
- Reduced skin uniformity
- Altered skin quality

Typical Patient Profile

- Significant weight changes
- Pregnancy
- Growth spurts

Treatment Goal

Improve overall skin quality and support tissue repair.

TherapDerma Solution

- Repaired Skin

Why This Solution

Because it was designed to support tissue-repair protocols and improve the appearance of stretch marks across multiple body areas.

STRETCH MARKS PATIENT 7

Anatomical Area

Body

Concern

Stretch Marks with Skin Laxity

What I Observe

- Stretch marks
- Reduced skin firmness
- Tissue relaxation
- Loss of skin quality

Typical Patient Profile

- Post-pregnancy patients
- Post-weight-loss patients

Treatment Goal

Improve skin quality and support tissue firmness.

TherapDerma Solution

- ✓ Repaired Skin + Miami Body

Why This Solution

Because Repaired Skin supports dermal regeneration while Miami Body contributes to improved skin quality and tissue firmness.

STRETCH MARKS PATIENT 8

Anatomical Area

Body

Concern

Advanced Stretch Mark Management

What I Observe

- Extensive stretch marks
- Reduced skin quality
- Significant tissue changes
- Complex skin concerns

Typical Patient Profile

- Long-standing stretch marks
- Extensive affected areas

Treatment Goal

Maximise skin regeneration and improve overall skin quality.

TherapDerma Solution

- ✓ Repaired Skin + Golden Body Reshape

Why This Solution

Because Repaired Skin supports tissue repair while Golden Body Reshape provides advanced biomimetic support for skin-quality enhancement.

QUICK CLINICAL SUMMARY – STRETCH MARKS

Concern	TherapDerma Solution
Recent Stretch Marks (Striae Rubrae)	✓ Repaired Skin
Mature Stretch Marks (Striae Albae)	✓ Repaired Skin
Stretch Marks After Pregnancy	✓ Repaired Skin
Stretch Marks Associated with Weight Gain	✓ Repaired Skin
Hormonal Stretch Marks	✓ Repaired Skin
Multiple Stretch Marks	✓ Repaired Skin
Stretch Marks with Skin Laxity	✓ Repaired Skin + Miami Body
Advanced Stretch Mark Management	✓ Repaired Skin + Golden Body Reshape

QUICK DECISION GUIDE

I observe recent stretch marks

→ ✓ Repaired Skin

I observe mature stretch marks

→ ✓ Repaired Skin

I observe stretch marks after pregnancy

→ ✓ Repaired Skin

I observe stretch marks following weight gain

→ ✓ Repaired Skin

I observe hormonal stretch marks

→ ✓ Repaired Skin

I observe stretch marks in multiple body areas

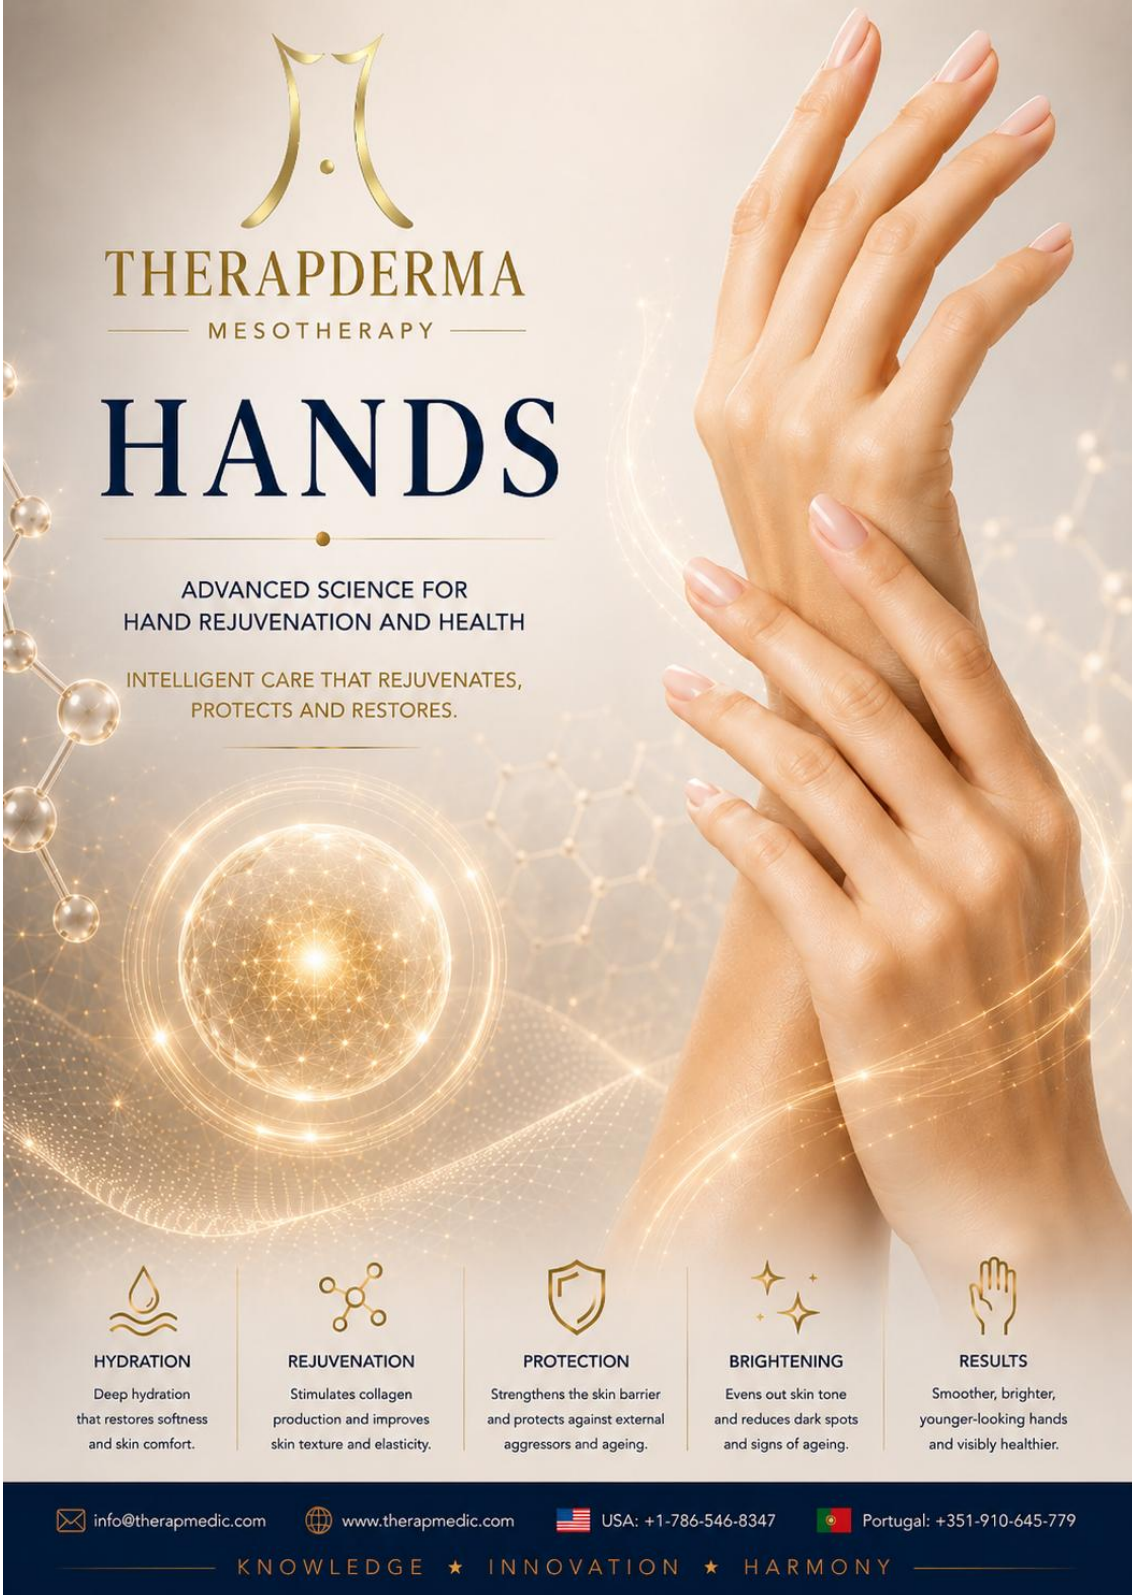

→ ✓ Repaired Skin

I observe stretch marks associated with skin laxity

→ ✓ Repaired Skin + Miami Body

I want advanced stretch mark management

→ ✓ Repaired Skin + Golden Body Reshape

THERAPDERMA
— MESOTHERAPY —
HANDS

ADVANCED SCIENCE FOR
HAND REJUVENATION AND HEALTH

INTELLIGENT CARE THAT REJUVENATES,
PROTECTS AND RESTORES.

 HYDRATION Deep hydration that restores softness and skin comfort.	 REJUVENATION Stimulates collagen production and improves skin texture and elasticity.	 PROTECTION Strengthens the skin barrier and protects against external aggressors and ageing.	 BRIGHTENING Evens out skin tone and reduces dark spots and signs of ageing.	 RESULTS Smoother, brighter, younger-looking hands and visibly healthier.

— KNOWLEDGE ★ INNOVATION ★ HARMONY —

AREA 20 – HANDS

HANDS PATIENT 1

Anatomical Area

Hands

Concern

Wrinkled Hands

What I Observe

- Visible wrinkles
- Thin skin
- Loss of elasticity
- Ageing appearance

Typical Patient Profile

- Over 45 years old
- Frequent sun exposure

Treatment Goal

Improve skin quality and reduce the appearance of ageing.

TherapDerma Solution

- Mesolifting

Why This Solution

Because it was specifically developed to improve skin firmness, elasticity and overall skin quality.

HANDS PATIENT 2

Anatomical Area

Hands

Concern

Skin Laxity

What I Observe

- Loss of firmness
- Thin skin
- Reduced tissue support
- Ageing appearance

Typical Patient Profile

- Over 50 years old

Treatment Goal

Improve dermal quality and support tissue firmness.

TherapDerma Solution

- Baby Face

Why This Solution

Because it helps improve dermal density and overall skin quality in ageing tissues.

HANDS PATIENT 3

Anatomical Area

Hands

Concern

Dehydrated Hands

What I Observe

- Dry skin
- Rough texture
- Fine dehydration lines
- Reduced skin comfort

Typical Patient Profile

- Any age group
- Frequent hand washing
- Environmental exposure

Treatment Goal

Restore hydration and improve skin quality.

TherapDerma Solution

- ✓ Hyaluronic Acid 3.5% Low Viscosity

Why This Solution

Because it provides intensive hydration and helps improve elasticity and overall skin appearance.

HANDS PATIENT 4

Anatomical Area

Hands

Concern

Pigmented Hands

What I Observe

- Dark spots
- Uneven skin tone
- Signs of photoageing
- Reduced radiance

Typical Patient Profile

- Over 40 years old
- Frequent sun exposure

Treatment Goal

Improve skin tone uniformity and overall skin quality.

TherapDerma Solution

- ✓ Revital Mix

Why This Solution

Because it is TherapDerma's specific pigmentation solution, helping improve skin tone uniformity and the appearance of pigmented skin.

HANDS PATIENT 5

Anatomical Area

Hands

Concern

Ageing Hands

What I Observe

- Wrinkles
- Pigmentation
- Thin skin
- Reduced elasticity
- Visible signs of ageing

Typical Patient Profile

- Over 50 years old

Treatment Goal

Improve overall skin quality and rejuvenate the hands.

TherapDerma Solution

- PDRN Renaissance

Why This Solution

Because it was designed for advanced cellular regeneration and improvement of ageing skin quality.

HANDS PATIENT 6

Anatomical Area

Hands

Concern

Loss of Skin Density

What I Observe

- Thin skin
- Prominent tendons
- Visible veins
- Reduced dermal support

Typical Patient Profile

- Advanced ageing
- Significant loss of skin quality

Treatment Goal

Improve dermal quality and support tissue regeneration.

TherapDerma Solution

- Muraxin Gold

Why This Solution

Because it provides advanced biomimetic support for deep dermal regeneration and improvement of skin quality.

HANDS PATIENT 7

Anatomical Area

Hands

Concern

Photoaged Hands

What I Observe

- Pigmentation
- Wrinkles
- Reduced radiance
- Visible sun damage

Typical Patient Profile

- Frequent sun exposure
- Outdoor lifestyles

Treatment Goal

Improve skin quality and support skin revitalisation.

TherapDerma Solution

- ✓ Anti-Aging with Vitamin C

Why This Solution

Because it provides antioxidant support and helps improve the appearance of photoaged skin.

HANDS PATIENT 8

Anatomical Area

Hands

Concern

Comprehensive Hand Rejuvenation

What I Observe

- Wrinkles
- Pigmentation
- Dehydration
- Reduced elasticity
- Ageing appearance

Typical Patient Profile

- Patients seeking complete hand rejuvenation

Treatment Goal

Achieve comprehensive improvement of skin quality and appearance.

TherapDerma Solution

- ✓ PDRN Renaissance + Hyaluronic Acid 3.5% Low Viscosity

Why This Solution

Because PDRN Renaissance supports regeneration while Hyaluronic Acid 3.5% Low Viscosity improves hydration and skin quality.

— KNOWLEDGE ★ INNOVATION ★ HARMONY —

AREA 21 – LEGS

LEGS PATIENT 1

Anatomical Area

Legs

Concern

Heavy Legs

What I Observe

- Sensation of heaviness
- Mild swelling
- Reduced comfort
- Signs of fluid retention

Typical Patient Profile

- Women
- Standing occupations
- Sedentary lifestyle

Treatment Goal

Improve comfort and support body detoxification.

TherapDerma Solution

- Fat Preventor

Why This Solution

Because it was specifically developed for body detoxification and contour-improvement protocols associated with fluid retention.

LEGS PATIENT 2

Anatomical Area

Legs

Concern

Fluid Retention

What I Observe

- Swelling
- Puffiness
- Reduced definition
- Signs of water retention

Typical Patient Profile

- Women
- Hormonal fluctuations
- Sedentary lifestyle

Treatment Goal

Support detoxification and improve the appearance associated with fluid retention.

TherapDerma Solution

- Fat Preventor

Why This Solution

Because it helps support protocols intended to improve body comfort and fluid-retention-related concerns.

LEGS PATIENT 3

Anatomical Area

Legs

Concern

Cellulite of the Legs

What I Observe

- Orange-peel appearance
- Reduced skin smoothness
- Visible cellulite

Typical Patient Profile

- Women
- Localised adiposity

Treatment Goal

Improve skin appearance and support body contour enhancement.

TherapDerma Solution

- Miami Body

Why This Solution

Because it helps improve body contour and skin quality in areas affected by cellulite.

LEGS PATIENT 4

Anatomical Area

Legs

Concern

Spider Veins

What I Observe

- Small visible superficial vessels
- Red or purple vascular patterns
- Cosmetic vascular concerns

Typical Patient Profile

- Women
- Genetic predisposition
- Hormonal influence

Treatment Goal

Improve the overall appearance of the legs and support skin quality.

TherapDerma Solution

- Anti-Aging with Vitamin C

Why This Solution

Because it helps improve skin quality and provides antioxidant support in patients presenting vascular-related aesthetic concerns.

LEGS PATIENT 5

Anatomical Area

Legs

Concern

Varicose Vein-Prone Skin

What I Observe

- Visible vascular changes
- Reduced skin quality
- Signs associated with circulatory concerns

Typical Patient Profile

- Women
- Standing occupations
- Family history

Treatment Goal

Improve skin quality and support overall leg appearance.

TherapDerma Solution

- Anti-Aging with Vitamin C

Why This Solution

Because it contributes to skin revitalisation and helps improve the appearance of skin exposed to chronic circulatory stress.

LEGS PATIENT 6

Anatomical Area

Legs

Concern

Skin Laxity

What I Observe

- Reduced firmness
- Tissue relaxation
- Altered skin quality

Typical Patient Profile

- Over 45 years old
- Weight fluctuations

Treatment Goal

Improve skin quality and support tissue firmness.

TherapDerma Solution

- Miami Body

Why This Solution

Because it was specifically developed to improve body skin quality and support firmer-looking skin.

LEGS PATIENT 7

Anatomical Area

Legs

Concern

Ageing Legs

What I Observe

- Reduced skin quality
- Skin laxity
- Loss of radiance
- Signs of ageing

Typical Patient Profile

- Over 50 years old

Treatment Goal

Improve overall skin quality and rejuvenate the appearance of the legs.

TherapDerma Solution

- Golden Body Reshape

Why This Solution

Because it represents TherapDerma's premium biomimetic solution for improving body skin quality and supporting tissue regeneration.

LEGS PATIENT 8

Anatomical Area

Legs

Concern

Comprehensive Leg Rejuvenation

What I Observe

- Fluid retention
- Cellulite
- Skin laxity
- Reduced skin quality

Typical Patient Profile

- Patients seeking complete improvement of leg appearance

Treatment Goal

Achieve comprehensive enhancement of skin quality and overall leg appearance.

TherapDerma Solution

- Fat Preventor + Miami Body

Why This Solution

Because Fat Preventor helps address fluid-retention-related concerns while Miami Body improves skin quality and body contour.

AREA 22 – BUTTOCKS

BUTTOCKS PATIENT 1

Anatomical Area

Buttocks

Concern

Skin Laxity

What I Observe

- Loss of firmness
- Reduced projection
- Tissue relaxation
- Reduced skin quality

Typical Patient Profile

- Weight fluctuations
- Progressive ageing

Treatment Goal

Improve firmness and support tissue quality.

TherapDerma Solution

- Miami Body

Why This Solution

Because it was specifically developed to improve body skin quality and support firmer-looking tissues.

BUTTOCKS PATIENT 2

Anatomical Area

Buttocks

Concern

Cellulite

What I Observe

- Orange-peel appearance
- Reduced skin smoothness
- Visible cellulite

Typical Patient Profile

- Women
- Localised adiposity

Treatment Goal

Improve skin quality and support body contour enhancement.

TherapDerma Solution

- California Look

Why This Solution

Because it contributes to body contour improvement and supports aesthetic remodelling in areas affected by cellulite.

BUTTOCKS PATIENT 3

Anatomical Area

Buttocks

Concern

Loss of Volume

What I Observe

- Reduced projection
- Flattened appearance
- Loss of contour harmony

Typical Patient Profile

- Weight-loss patients
- Progressive ageing

Treatment Goal

Improve tissue quality and enhance the overall appearance of the buttocks.

TherapDerma Solution

- ✓ Golden Body Reshape

Why This Solution

Because it represents TherapDerma’s premium biomimetic solution for improving tissue quality and body aesthetics.

BUTTOCKS PATIENT 4

Anatomical Area

Buttocks

Concern

Cellulite Associated with Skin Laxity

What I Observe

- Visible cellulite
- Reduced firmness
- Tissue relaxation
- Altered contour

Typical Patient Profile

- Women over 40 years old
- Weight fluctuations
- Progressive ageing

Treatment Goal

Improve skin quality and support buttock contour enhancement.

TherapDerma Solution

- ✓ Miami Body + California Look

Why This Solution

Because Miami Body improves skin quality while California Look contributes to contour harmonisation and body remodelling.

BUTTOCKS PATIENT 5

Anatomical Area

Buttocks

Concern

Stretch Marks

What I Observe

- Visible stretch marks
- Reduced skin uniformity
- Signs of tissue stretching

Typical Patient Profile

- Post-pregnancy patients
- Weight fluctuations
- Rapid body changes

Treatment Goal

Improve skin quality and support dermal regeneration.

TherapDerma Solution

- Repaired Skin

Why This Solution

Because it was specifically developed to support skin-repair protocols and improve the appearance of stretch marks.

BUTTOCKS PATIENT 6

Anatomical Area

Buttocks

Concern

Fibrosis

What I Observe

- Areas of hardening
- Tissue irregularities
- Reduced tissue flexibility
- Post-procedure changes

Typical Patient Profile

- Post-aesthetic procedure patients
- Post-surgical patients

Treatment Goal

Support tissue remodelling and improve tissue quality.

TherapDerma Solution

- Scar Free

Why This Solution

Because it is TherapDerma's dedicated solution for fibrosis-management and scar-remodelling protocols.

BUTTOCKS PATIENT 7

Anatomical Area

Buttocks

Concern

Poor Skin Quality

What I Observe

- Dull appearance
- Reduced elasticity
- Lack of radiance
- Ageing skin changes

Typical Patient Profile

- Over 40 years old
- Photoageing
- Lifestyle-related skin deterioration

Treatment Goal

Improve skin quality and revitalise the tissues.

TherapDerma Solution

- Golden Body Reshape

Why This Solution

Because it provides advanced biomimetic support for skin-quality enhancement and tissue revitalisation.

BUTTOCKS PATIENT 8

Anatomical Area

Buttocks

Concern

Comprehensive Buttock Rejuvenation

What I Observe

- Skin laxity
- Cellulite
- Reduced skin quality
- Loss of contour harmony

Typical Patient Profile

- Patients seeking complete buttock enhancement

Treatment Goal

Achieve comprehensive improvement of buttock appearance and tissue quality.

TherapDerma Solution

- Miami Body + Golden Body Reshape

Why This Solution

Because Miami Body improves skin quality and contour while Golden Body Reshape provides premium biomimetic support for tissue enhancement.
